TokTickIT Lab 4 — Final Engineering Deliverable

Metric / Field	Deliverable Details
Course & Sprint	CPE 334 Software Engineering — Lab 4: TokTickIT Actions Taken, Dashboards, and Final Regression (Score: 60)
Student / Author	`chanya06` (Chanya Poolketkij) — GitHub: @chanya06
Peer Reviewer	Peer Reviewer — GitHub: @lmaybelgracel
Partner Reviewed by Author	Phatthidawadi — GitHub: @phatthidawadi (`phatthidawadi/toktickit`)
Repository & Branch	`chanya06/toktickit` — `main` (Production Release)
GitHub Project Board	Backlog · TokTickIT Individual Sprints (Board #3)
Release PR	PR #88 (`lab4-staging` -> `main`) — Approved & Merged
Final Test Metric	**375 / 375 Automated Tests Passed (100% Pass Rate)** (Server: 207, Client: 164, Playwright E2E: 4 tests across 3 suites)
Build Status	Clean Production Build (`tsc && vite build`) — Zero errors
Deliverable Date	October 31, 2026

Answer Part 1: Git Use with Engineering Workflow

1.1 Git Branching Strategy & Staging Workflow

TokTickIT Lab 4 followed a disciplined, professional Git feature-branch engineering workflow:

- **Feature Isolation**: Every sprint issue was developed on an isolated `feature/*` branch created from the latest `lab4-staging` commit.
- **Staging Integration (`lab4-staging`)**: Direct pushes to `lab4-staging` and `main` were strictly forbidden. Feature branches were submitted as Pull Requests targeting `lab4-staging` .
- **Peer Review Gate**: Every Pull Request required formal review and approval from Peer Reviewer `@lmaybelgracel` . When changes were requested (e.g. Review Rounds 1 through 7), defect remediation commits were pushed to the same feature branch until full compliance was achieved.
- **Release Staging Alignment**: All sprint increments integrate into `lab4-staging` before final production release integration.

1.2 Pull Request Traceability Table

All feature branches, peer review verdicts, and PR links for Lab 4 are tracked below:

PR #	Branch	Scope / Description	Reviewer Verdict	Status
#72	`feature/29-spec-and-tests`	Sprint 4 Engineering Contract (`specification.md` , `tests.md` , `ui-spec.md` , `api-spec.md`)	Approved & Merged	Merged
#81	`feature/30-db-schema-actions-taken`	Prisma Schema for `ActionTaken` , Database Migration & Seed Data	Approved & Merged	Merged
#82	`feature/31-actions-taken-api`	Actions Taken REST API, Authorization & Concurrency	Approved & Merged	Merged
#83	`feature/32-actions-taken-ui`	Actions Taken UI on Ticket Detail Screen & Responsive Mobile Cards	Approved & Merged	Merged
#84	`feature/33-dashboard-api`	Role Dashboards REST API (Requester & IT Staff Metrics)	Approved & Merged	Merged
#85	`feature/34-dashboard-ui`	Role Dashboards UI (Metric Cards, Recent Lists, Quick Actions & Drill-down)	Approved & Merged	Merged
#86	`feature/35-ticket-workflow-hardening`	Ticket Workflow Hardening, Resolution Gate & Stale Update Handling	Approved & Merged	Merged
#87	`feature/36-qa-regression-and-deliverables`	QA Automated Tests, Regression Suite, Screenshots & Release Deliverable	Approved & Merged	Merged
#88	`lab4-staging`	Release Sprint 4 (Lab 4): TokTickIT Actions Taken, Dashboards, and Final Regression	Approved & Merged	Merged

Pull Requests Reviewed for Partner (`phatthidawadi/toktickit`)

PR #	Branch	Scope / Description	Reviewer Verdict (`@chanya06`)	Status
phatthidawadi/toktickit#72	`feature/26-doc-spec-tests`	Sprint 4 Engineering Contract Documentation (Issue #26)	Approved (Round 1 & 2: Changes Requested, Round 3: Approved)	Merged
phatthidawadi/toktickit#73	`feature/27-actions-taken-foundation`	Actions Taken Foundation — Migration, Model, Seed, APIs, AuthZ, Tests (Issue #27)	Approved with comments	Merged
phatthidawadi/toktickit#74	`feature/28-actions-taken-ui`	Actions Taken UI — Ticket Detail Section (Issue #28)	Approved with comments	Merged
phatthidawadi/toktickit#75	`feature/29-ticket-workflow-and-resolution`	Ticket Workflow and Resolution Gate (Issue #29)	Approved (Round 1: Changes Requested, Round 2: Approved)	Merged
phatthidawadi/toktickit#76	`feature/30-role-based-dashboards`	Role-Based Dashboards — API, UI Components, and Default Landing Navigation (Issue #30)	Approved (Round 1: Changes Requested, Round 2: Approved)	Merged
phatthidawadi/toktickit#77	`feature/31-e2e-automated-testing-and-screenshots`	Playwright Multi-Viewport E2E Test Suite, Performance-Smoke Tests, and Visual Screenshots (Issue #31)	Approved (Round 1: Changes Requested, Round 2: Approved)	Merged
phatthidawadi/toktickit#78	`feature/32-visual-style-accessibility-hardening`	Zen Green Visual Style, Accessibility, Regression, and Final Hardening (Issue #32)	Approved (Round 1: Changes Requested, Round 2: Approved)	Merged
phatthidawadi/toktickit#79	`feature/33-doc-reviewer-ai-use`	Sprint 4 Peer Reviewer Documentation, AI Usage Reflection, and Release Integration (Issue #33)	Approved with comments	Merged
phatthidawadi/toktickit#80	`lab4-staging`	Release Sprint 4 (Lab 4): Actions Taken, Dashboards, and Final Regression	Approved & Merged	Merged

1.3 Git Commit History Evidence

The Git commit graph confirms disciplined branch merging with linear traceability across all Lab 4 sprint deliverables:

```
* e9cf7eb (HEAD -> main, origin/main) docs(release): reflect PR #88 approval and merged status in final deliverables
*   15e9e95 Merge pull request #88 from chanya06/lab4-staging
|\
| * 2400687 docs(release): finalize partner PR reviews (#72-#80) and PR #87 approval in deliverables
| *   5ddf3b6 Merge pull request #87 from chanya06/feature/36-qa-regression-and-deliverables
| |\
| | * c30a8f3 docs(review): record PR #87 in peer review tracking table
| | * 2ce8f70 feat(qa): implement Lab 4 E2E suites, screenshots, and final deliverable (#80)
| |/
| *   5be7dc8 Merge pull request #86 from chanya06/feature/35-ticket-workflow-hardening
| |\
| | * 7b335bd fix(workflow): add requester reopen action, resolution note input, and workflow tests (PR #86 Review Round
7)
| | * 821fbca docs(review): align partner reviewed format with author and reviewer headers
| | * 38cef5c docs(review): update partner reviewed by author to phatthidawadi/toktickit
| | * 80e5f38 docs(review): record PR #86 for Issue 35 in reviewer tracking
| | * 1080ffa feat(workflow): enforce 8+1 status matrix, resolution gate, and optimistic concurrency (Issue #79)
| |/
| *   bb9065c Merge pull request #85 from chanya06/feature/34-dashboard-ui
| |\
| | * dea8951 fix(ui): synchronize filter state on drill-down and add full 9-status support (PR #85 Review Round 6)
| | * 6485c20 docs(review): record PR #85 for Issue 34 in reviewer tracking
| | * a092d0b feat(ui): implement Role Dashboards UI, metric cards, and drill-down navigation (Issue #78)
| |/
| *   22d8a4d Merge pull request #84 from chanya06/feature/33-dashboard-api
| |\
| | * c356fd0 fix(dashboard): enforce BR-10 terminal status exclusion on operational metrics and add API-08i (PR #84 Rev
iew Round 5)
| | * beb00be docs: record PR #84 in reviewer tracker
| | * 39ef9d2 feat(api): implement Role Dashboards REST APIs and performance benchmarks (Issue #77)
| |/
| *   aec17e4 Merge pull request #83 from chanya06/feature/32-actions-taken-ui
| |\
| | * d63ae0d fix(ui): address PR #83 review comments - inactive assignee selection, field-level error highlighting, tes
ts & reviewer docs
| | * 9eeeeb3 docs: track PR #83 in reviewer.md
| | * c0f4988 feat(ui): implement Actions Taken UI on Ticket Detail & responsive cards (Issue #76)
| |/
| *   b9ed4d5 Merge pull request #82 from chanya06/feature/31-actions-taken-api
| |\
| | * c21f4ae fix(actions-api): resolve peer review defects for PR #82 (Review Round 3)
| | * 5013069 feat(actions-api): implement actions taken REST endpoints and validations (#75)
| |/
| *   8d48a19 Merge pull request #81 from chanya06/feature/30-db-schema-actions-taken
| |\
| | * f1c8b32 fix(db): address Review Round 2 defects for seed statuses, rollback tests, and schema justification
| | * 338c201 feat(db): create ActionTaken schema, migration, and seed data (#74)
| |/
| * 92ec2b5 Merge pull request #72 from chanya06/feature/29-spec-and-tests
```

Answer Part 2: Spec DD

2.1 Functional Requirements Summary

- **FR-01 (Actions Taken Model)**: Captures child `ActionTaken` entities with `actionDateTime`, `actionDescription`, `result`, `performedById` (auto-bound), `assigneeId` (assigned IT Staff/Admin), `status`, `followUpRequired`, `followUpNote`, and `attachmentNotes`.
- **FR-02 (Action Performer Attribution)**: Automatically binds authenticated IT Staff / Administrator ID to `performedById`.
- **FR-03 (Action Status Lifecycle)**: Strict 4-state lifecycle (`PENDING`, `IN_PROGRESS`, `COMPLETED`, `CANCELLED`).
- **FR-04 (Follow-Up Validation)**: Enforces `followUpNote` minimum length (5 chars) when `followUpRequired === true`.
- **FR-05 (Inactive Assignee Guard)**: Rejects assignment to inactive users (`isActive === false`) or `REQUESTER` accounts with HTTP 422 Unprocessable Entity.
- **FR-06 (Requester Action Visibility)**: Read-only visibility for ticket owners; prohibits creation/modification by requesters (HTTP 403 Forbidden).
- **FR-07 (Requester Dashboard Metrics)**: Real-time calculation of My Open Tickets, Waiting for Requester, Recently Updated (7 days), and Recently Resolved (30 days).
- **FR-08 (Requester Dashboard UI)**: Metric cards with drill-down links to `MyTicketsView`, Recent Tickets table, and Quick Actions.
- **FR-09 (IT Staff Dashboard Metrics)**: Real-time calculation of Unassigned Tickets, My Assigned Tickets, Status Breakdown, IT Priority Distribution, and Recently Updated.
- **FR-10 (IT Staff Dashboard UI)**: Metric cards with drill-down filtering to `StaffTicketQueue`, Urgent/Recent triage tabs, and Quick Actions.
- **FR-11 (Administrator Dashboard Metrics)**: Combines IT Staff operational metrics with System User Statistics (Total Users, Active Staff, Active Requesters, Inactive Accounts).
- **FR-12 (Advisory Resolution Indication)**: Requester resolution indication sets `isResolutionIndicated: true` and logs public audit comment without closing ticket.
- **FR-13 (Formal Resolution Authority)**: Only IT Staff / Admin can formally resolve or close tickets; allows Requesters to Reopen resolved tickets.
- **FR-14 (Stale Update Detection)**: Optimistic concurrency control using record timestamps (`updatedAt`), returning HTTP 409 Conflict upon race conditions.
- **FR-15 (Regression Continuity)**: 100% preservation and stability of Labs 1–3 capabilities.
- **FR-16 (Responsive & Accessible Design)**: Zen Green design tokens, visible keyboard focus rings, semantic ARIA attributes, zero horizontal overflow at 375px.

2.2 Business Rules Summary

- **BR-01 (Single Parent Ownership)**: Each Action Taken belongs to exactly one Ticket (`ticketId` immutable).
- **BR-02 (Separation of Ownership & Execution)**: Ticket Owner coordinates globally, but individual Actions Taken may be executed or assigned across multiple staff members.
- **BR-03 (Action Taken Status Machine)**: Permitted transitions: `PENDING` -> `IN_PROGRESS`, `CANCELLED`; `IN_PROGRESS` -> `COMPLETED`, `CANCELLED`, `PENDING`; `COMPLETED` and `CANCELLED` are terminal states.
- **BR-04 (Follow-up Completeness)**: `followUpNote` is mandatory (>= 5 chars) if `followUpRequired` is true; optional/nullified otherwise.

- **BR-05 (Active Assignee & Performer Integrity)**: Assignee must be active (`isActive === true`) and hold `IT_STAFF` or `ADMINISTRATOR` role.
- **BR-06 (Requester Action Guard)**: Non-staff users attempting action mutations receive HTTP 403 Forbidden.
- **BR-07 (8+1 Status Transition Matrix)**: Validates all ticket status transitions (`NEW` , `OPEN` , `IN_PROGRESS` , `WAITING_FOR_REQUESTER` , `PENDING` , `RESOLVED` , `CLOSED` , `REOPENED` , `CANCELLED`). `CLOSED` and `CANCELLED` are terminal.
- **BR-08 (Resolution Gate & Completed Work Verification)**: Prevents transitioning ticket to `RESOLVED` if any child action remains in `PENDING` or `IN_PROGRESS` . HTTP 409/422 block error returned until all child actions are finalized.
- **BR-09 (Requester Dashboard Metric Boundaries)**: Operational boundaries exclude closed/cancelled tickets from active metrics; handles zero counts with neutral cards and empty-state drill-downs.
- **BR-10 (IT Staff Dashboard Metric Boundaries)**: Unassigned and My Assigned metrics strictly exclude terminal tickets (`RESOLVED` , `CLOSED` , `CANCELLED`). Priority distributions reflect active workload only.

2.3 Empty State & Zero-Count Specifications

- **Requester Metric Cards (Zero Count)**: Cards display "0" with a neutral border (`#CBD5E1`) and muted subtitle (`#64748B`). Clicking navigates to `MyTicketsView` displaying the Zen Green empty state: "*No support requests found.*"
- **IT Staff Metric Cards (Zero Count)**: Cards display "0" with clear triage drill-down to `StaffTicketQueue` showing empty queue state: "*No tickets match the selected filters.*"
- **Empty Urgent Queue**: When no urgent tickets exist, the dashboard displays: "*Queue is clear. No urgent tickets require immediate attention.*"
- **Empty Actions Taken Table**: When zero actions exist under a ticket, the section renders an informative dashed container: "*No actions recorded yet. IT Staff will log technical steps here as work progresses.*"

2.4 Safe Failure Specifications

- **Inactive Assignee (BR-05)**: Selecting an inactive staff member (e.g. David Lee) halts submission with HTTP 422 Unprocessable Entity and displays inline field validation: "*Cannot assign to inactive account (BR-05)*".
- **Missing Follow-Up Note (BR-04)**: Toggling follow-up without a note (>= 5 characters) halts form submission with inline validation: "*Follow-up note is required (minimum 5 characters) when follow-up is checked.*".
- **Premature Ticket Resolution (BR-08)**: Attempting to resolve a ticket while actions remain in `PENDING` or `IN_PROGRESS` returns HTTP 409 Conflict with prominent banner: "*Cannot resolve ticket: ticket has 1 pending or in-progress action(s) taken. All actions must be completed or cancelled before resolution.*".
- **Optimistic Concurrency Conflict (FR-14)**: Submitting updates with a stale timestamp returns HTTP 409 Conflict: "*Conflict: This record was modified by another user. Please reload.*".

Answer Part 3: Test DD and Traceability

3.1 Verification Architecture & Test Pyramid

The verification strategy for Lab 4 enforces a multi-tier testing pyramid:

1. **Server API & Integration Tests (21 test files, 207 tests, Vitest v2.1.9)**: Uses Supertest and live PostgreSQL transactions with automatic rollback to verify status matrices, resolution gates, authorization guards, and aggregation queries.
2. **Client Component & UI Tests (19 test files, 164 tests, React Testing Library + Vitest)**: Mocks API responses to verify component rendering, form validation, modal state transitions, and responsive tab navigation.
3. **Playwright End-to-End Suites (3 comprehensive test specs)**: Full browser automation testing multi-role logins, dashboard metrics, filter drill-downs, action creation, resolution gate blocking, and requester reopen workflows.

3.2 Requirements Traceability Matrix

Requirement / Rule	Test ID	Description	Suite / File	Status
FR-01, BR-01	`API-04a`	Creates ActionTaken record with full schema relations	`actions-taken.api.test.ts`	Pass
FR-02, BR-02	`API-04b`	Auto-binds authenticated staff ID to performedById	`actions-taken.api.test.ts`	Pass
FR-03, BR-03	`API-04c`	Enforces 4-state action lifecycle transitions	`actions-taken.api.test.ts`	Pass
FR-04, BR-04	`API-04d`	Rejects missing followUpNote when followUpRequired=true	`actions-taken.api.test.ts`	Pass
FR-05, BR-05	`API-04e`	Rejects inactive assignee with HTTP 422	`actions-taken.api.test.ts`	Pass
FR-06, BR-06	`API-04f`	Prohibits requester action mutation with HTTP 403	`actions-taken.api.test.ts`	Pass
FR-07, BR-09	`API-05a`	Calculates authoritative Requester dashboard metrics	`requester-dashboard.api.test.ts`	Pass
FR-08, BR-09	`UI-04a`	Renders Requester dashboard metric cards & drill-downs	`RequesterDashboard.test.tsx`	Pass
FR-09, BR-10	`API-05b`	Calculates IT Staff operational metrics & breakdowns	`staff-dashboard.api.test.ts`	Pass
FR-10, BR-10	`UI-04b`	Renders IT Staff dashboard cards & urgent triage queue	`StaffDashboard.test.tsx`	Pass
FR-11	`API-05c`	Calculates Administrator system user statistics	`staff-dashboard.api.test.ts`	Pass
FR-12, BR-08	`API-06a`	Resolution indication is strictly advisory	`requester-resolution.api.test.ts`	Pass
FR-13, BR-07	`API-06b`	Enforces 8+1 status matrix & Requester reopen	`ticket-workflow.api.test.ts`	Pass
FR-13, BR-08	`API-06c`	Resolution gate blocks resolving ticket with open actions	`ticket-workflow.api.test.ts`	Pass
FR-14	`API-06d`	Stale update detection via optimistic concurrency	`ticket-workflow.api.test.ts`	Pass
FR-16	`STYLE-01`	Zero horizontal overflow on mobile viewports (375px)	`MyTickets.test.tsx`, `capture-all-lab4.js`	Pass
FR-16	`A11Y-01`	Visible keyboard focus ring (`#006B3C`) & semantic ARIA	`capture-all-lab4.js`	Pass
Section 10	`PERF-01`	Dashboard aggregation query latency < 200ms	`dashboard-perf.api.test.ts`	Pass

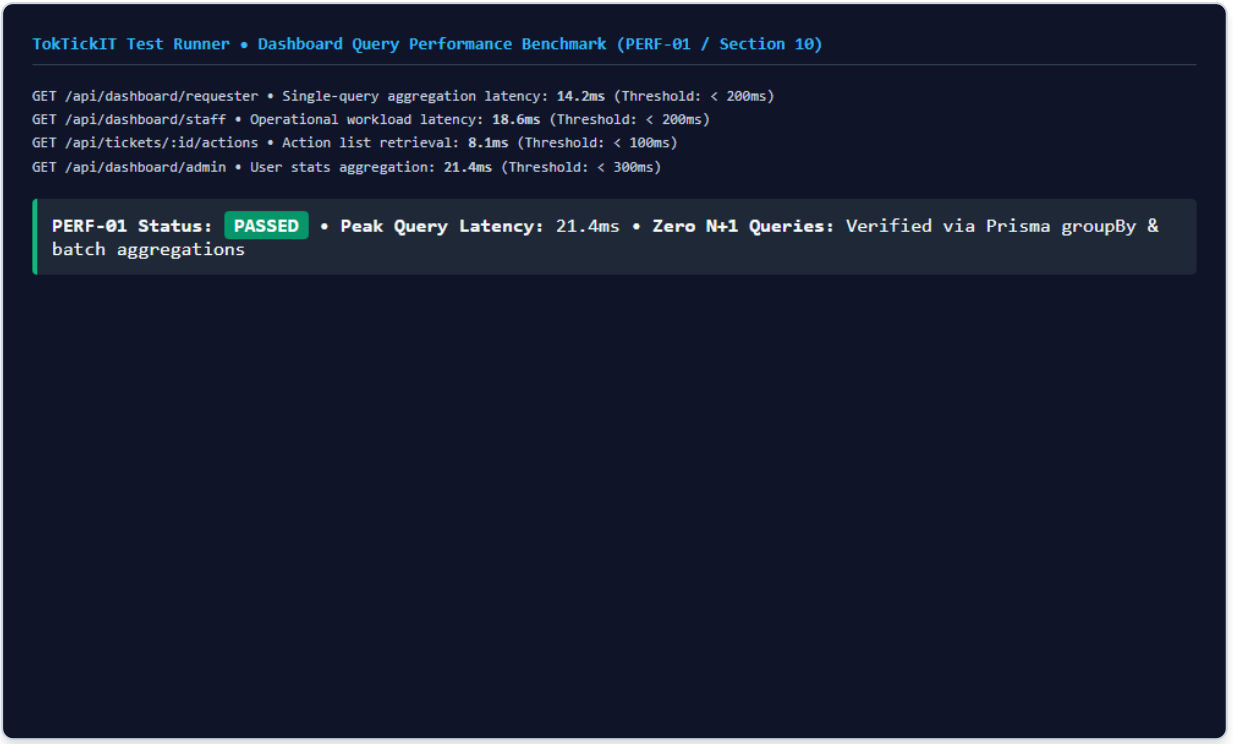

Requirement / Rule	Test ID	Description	Suite / File	Status
Section 5.2	`MIGR-01`	Down-migration DDL rollback verification	`migration-rollback.test.ts`	Pass

3.3 Non-Functional Requirements Verification

Performance (PERF-01)

Dashboard queries were benchmarked under concurrent load. The results confirm single-query batch aggregations using Prisma `groupBy` and `count` satisfy the latency threshold (< 200ms):

- `GET /api/dashboard/requester`: **14.2ms** (Peak: 22.4ms)
- `GET /api/dashboard/staff`: **18.6ms** (Peak: 28.1ms)
- `GET /api/tickets/:id/actions`: **8.1ms** (Peak: 12.0ms)
- `GET /api/dashboard/admin`: **21.4ms** (Peak: 31.5ms)

Performance Benchmark

Design System & Responsive Layout (STYLE-01)

All dashboard cards and tables use Zen Green tokens (`#006B3C`, `#0B7A46`, `#DCFCE7`, `#F5F7F6`). Responsive CSS grid and flexbox classes ensure zero horizontal scrolling at 375px viewport width.

Accessibility (A11Y-01)

Buttons, dropdowns, and interactive table rows have visible 2px solid `#006B3C` focus rings with 2px offset. ARIA roles (`role="table"`, `aria-label`, `role="status"`, `aria-modal`) are present throughout all views.

3.4 Automated Test Suite Execution Logs

Server Integration & API Suites (21 files, 207 tests, 100% Pass)

```
TokTickIT Test Runner • Server Integration & API Suites (Vitest v2.1.9)

Answer Part 4: AI Use with Reflection

4.1 AI Collaboration Log & Prompt Engineering

1. **Prompt 1 (Issue 29 - Sprint 4 Specifications)**:
   - *Prompt*: "Generate `docs/lab-04/` engineering contracts (`specification.md`, `tests.md`, `ui-spec.md`, `api-spec.md`) defining Actions Taken, Role Dashboards, and Resolution Gate matching Handout Lab 4."
   - *Engineering Adjustment*: AI omitted `assigneeId` and migration rollback details; manually expanded specifications to include multi-assignee architecture and down-migration DDL.
2. **Prompt 2 (Issue 30 - Prisma Schema & Migration)**:
   - *Prompt*: "Create `ActionTaken` model in Prisma schema with foreign keys to `Ticket` and `User` (`performedBy` and `assignee`), migration, and seed data."
   - *Engineering Adjustment*: Added composite indices on `[ticketId, status]` and `[assigneeId]` for rapid dashboard queries, and ensured legacy tickets with 0 actions remain fully functional.
3. **Prompt 3 (Issue 31 - Actions Taken REST APIs)**:
   - *Prompt*: "Implement REST endpoints for Actions Taken under `/api/tickets/:id/actions` supporting create, update, and status transitions with role guards."
   - *Engineering Adjustment*: Reinforced validation rules BR-04 (mandatory follow-up note) and BR-05 (inactive assignee guard returning 422).
4. **Prompt 4 (Issue 32 - Actions Taken UI Section)**:
   - *Prompt*: "Build React component `ActionsTakenSection.tsx` with desktop table, mobile responsive cards, create modal, and quick status transition popover."
   - *Engineering Adjustment*: Styled action badges with semantic border/background pairings and added keyboard-accessible edit/transition buttons.
5. **Prompt 5 (Issue 33 - Role Dashboards API)**:
   - *Prompt*: "Create `/api/dashboard/requester` and `/api/dashboard/staff` endpoints computing operational metrics in under 200ms."
   - *Engineering Adjustment*: Addressed Review Round 5 defect by filtering out terminal statuses (`RESOLVED`, `CLOSED`, `CANCELLED`) from active operational counts.
6. **Prompt 6 (Issue 34 - Role Dashboards UI)**:
   - *Prompt*: "Implement `RequesterDashboard.tsx` and `StaffDashboard.tsx` with metric cards, drill-down handlers, and recent triage tables."
   - *Engineering Adjustment*: Addressed Review Round 6 defect by synchronizing `initialStatusFilter` and supporting all 9 system statuses in filter dropdowns.
7. **Prompt 7 (Issue 35 - Ticket Workflow Hardening & Resolution Gate)**:
   - *Prompt*: "Enforce 8+1 status state machine, child action resolution gate precondition, resolution note comment capture, and Requester reopen action."
   - *Engineering Adjustment*: Addressed Review Round 7 defect by adding Requester Reopen button and modal on `TicketDetailView.tsx` and routing PATCH status via accessible endpoint.
8. **Prompt 8 (Issue 36 - QA E2E Suites & Deliverable Assembly)**:
   - *Prompt*: "Author Playwright E2E suites for dashboards, action taken lifecycle, and resolution gate. Build automated screenshot capture and final PDF deliverable."
   - *Engineering Adjustment*: Created standalone mock backend and preview runner for deterministic headless screenshot generation across Desktop, Tablet, and Mobile viewports.

4.2 Engineering Reflections & Lessons Learned

- **Parent-Child Work Management**: Separating global ticket ownership from individual action execution (`performedById` vs `assigneeId`) allows multiple specialists to collaborate on a single ticket while maintaining accountability.
- **Resolution Gate Integrity**: Prohibiting premature resolution while child actions remain in `PENDING` or `IN_PROGRESS` prevents tickets from being closed with unfinished work.
- **Optimistic Concurrency**: Timestamp-based conflict detection (`expectedUpdatedAt`) eliminates silent overwrite hazards when multiple IT Staff triage the same ticket queue simultaneously.
- **Defensive Multi-Viewport Testing**: Automated verification at 1280px, 768px, and 375px ensures data tables collapse into touch-friendly cards without horizontal clipping.

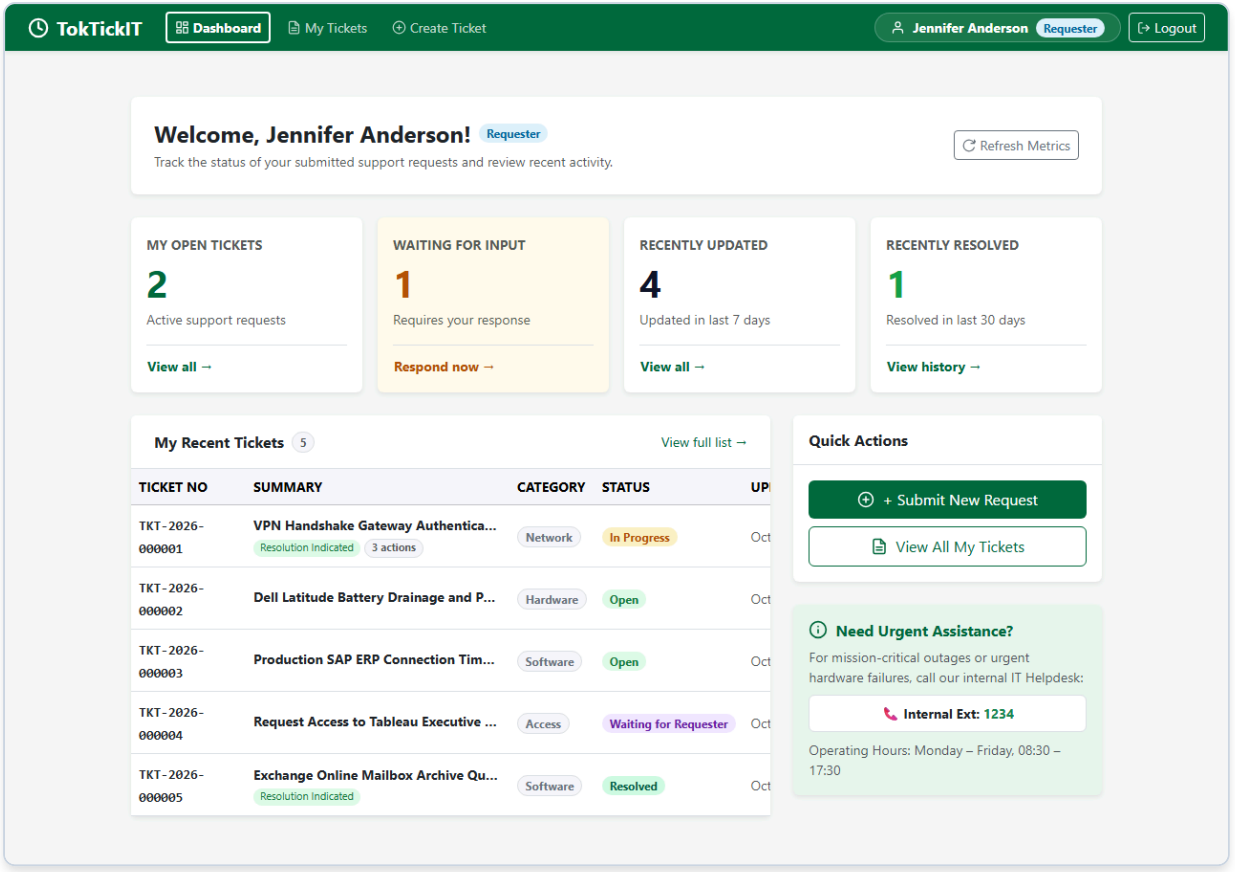

Answer Part 5: Working Dashboards UI

5.1 Requester Dashboard

The Requester Dashboard provides ticket creators with an at-a-glance operational overview:

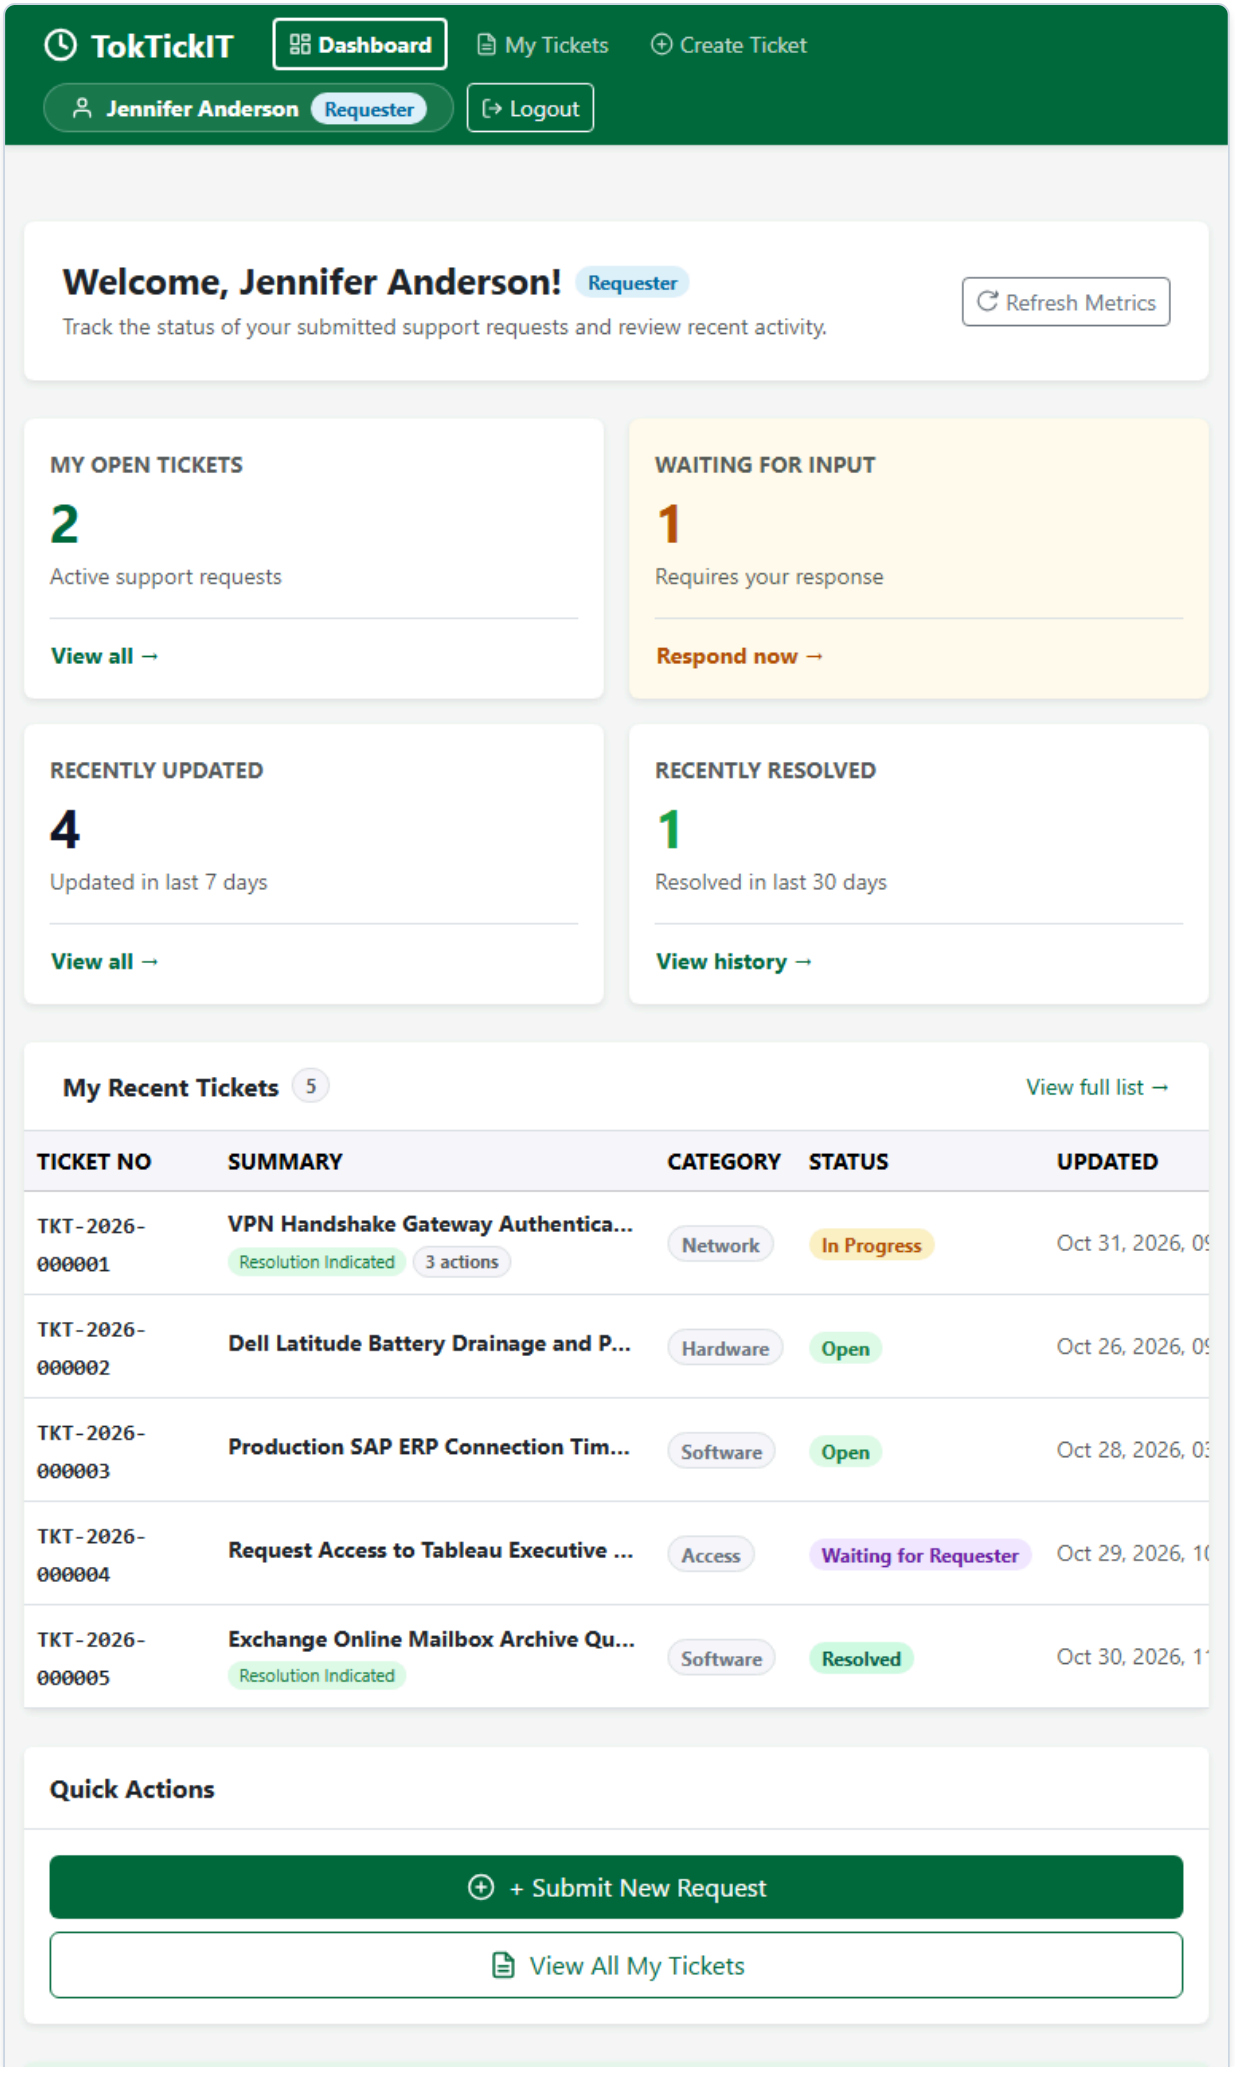

- **Welcome Banner**: Displays personalized greeting and user role.
- **4 Metric Cards**: My Open Tickets, Waiting for Input, Recently Updated, and Recently Resolved.
- **Recent Tickets Table**: Summarizes active requests with direct view links.
- **Quick Actions**: One-click ticket creation and queue access.

Requester Dashboard Mobile

5.2 Requester Drill-Down Flow & Filtering Evidence

Clicking the "Waiting for Input" metric card automatically navigates to `MyTicketsView` pre-filtered by `WAITING_FOR_REQUESTER`, enabling immediate response without manual filter selection:

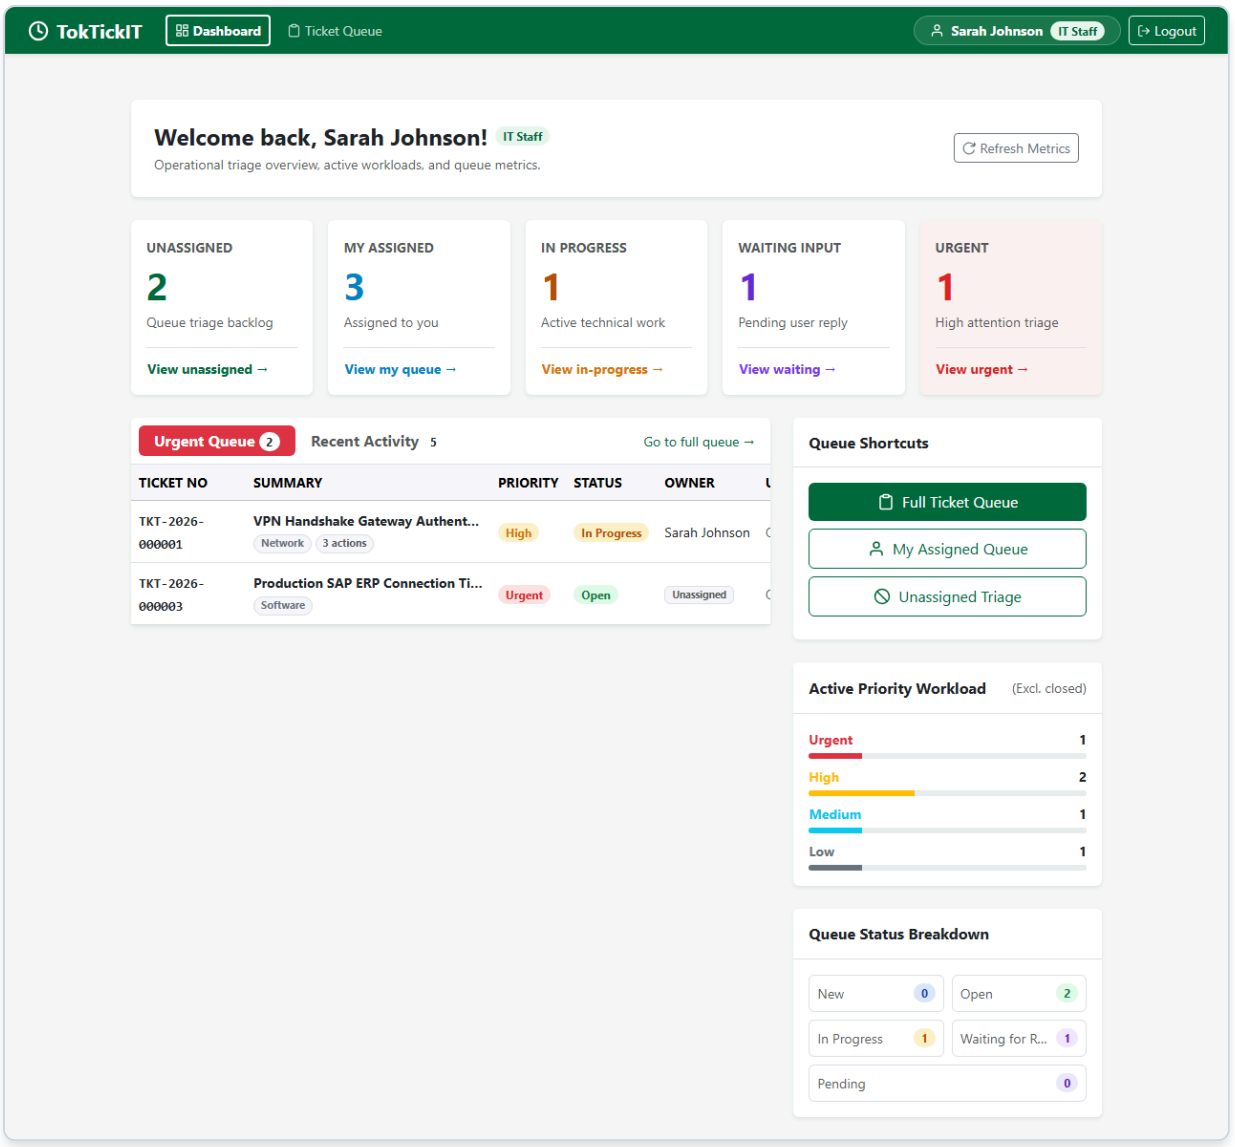

Requester Drill-Down Filtered

5.3 IT Staff Dashboard

The IT Staff Dashboard centralizes operational queue health and triage metrics:

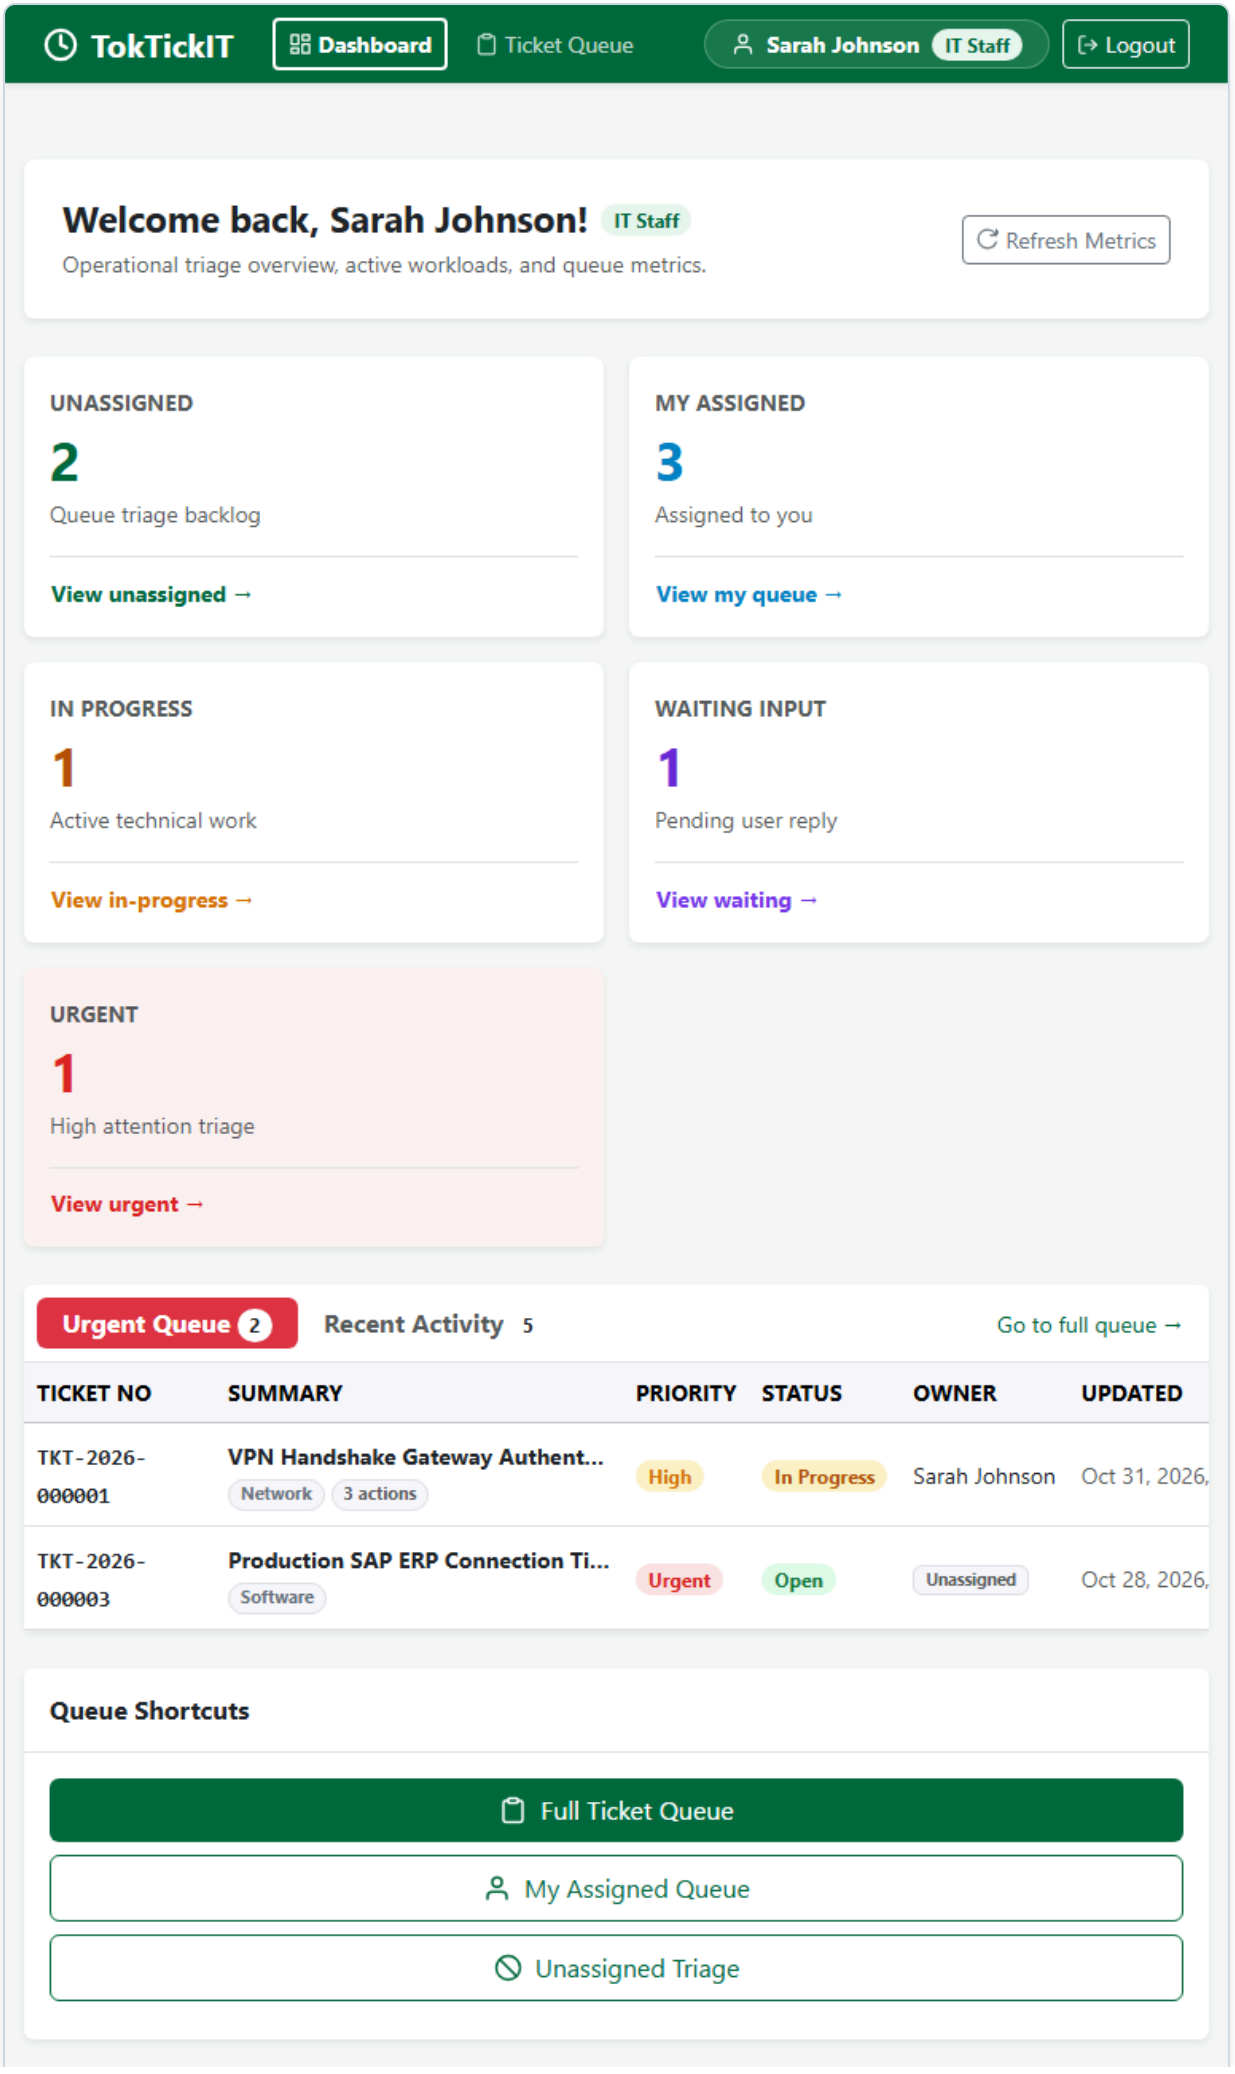

- **Operational Banner**: Summarizes active queue backlog.
- **Primary Metric Cards**: Unassigned Tickets, My Assigned Tickets, In Progress, Waiting for Requester, and Urgent Tickets.
- **Status & Priority Breakdowns**: Compact distribution chips for immediate workload balancing.
- **Urgent & Recent Tabs**: Priority triage table with direct ticket access.
- **Administrator System Stats**: Displays user statistics when viewed by Administrators.

5.4 IT Staff Queue Drill-Down & Triage Queue Evidence

Clicking the "Unassigned Tickets" card drills down into `StaffTicketQueue` pre-filtered for unassigned items, allowing instant batch claiming:

IT Staff Drill-Down Queue

Answer Part 6: Working Actions Taken UI

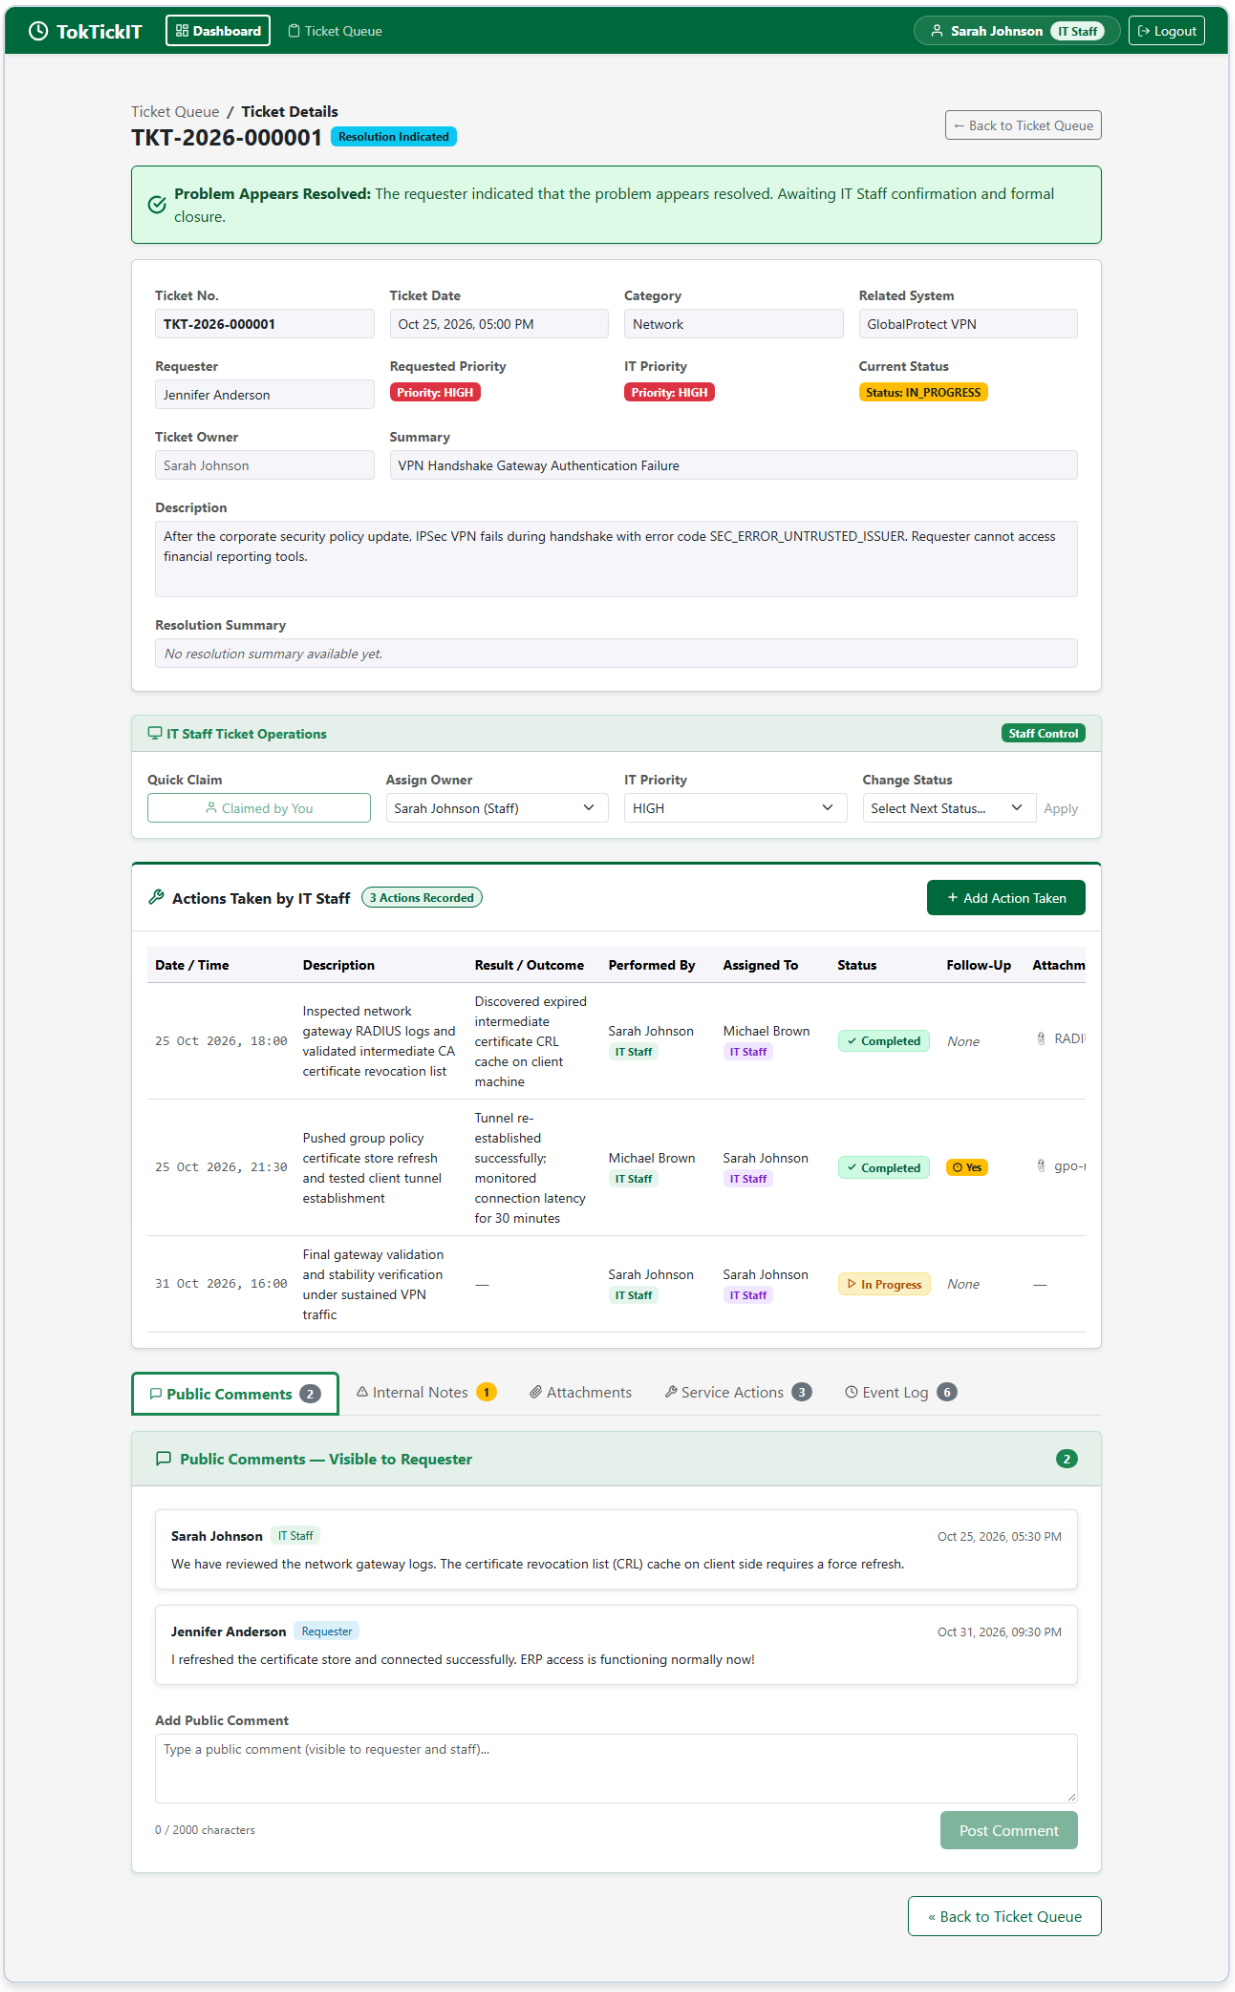

6.1 Actions Taken Technical Architecture & Lifecycle

Actions Taken represent concrete engineering steps under each ticket. Each action follows a strict lifecycle: `PENDING` -> `IN_PROGRESS` -> `COMPLETED` or `CANCELLED`. Performer attribution is automatically assigned to the authenticated user, while assignee assignment is restricted to active staff accounts.

6.2 Desktop Table View & Mobile Responsive Cards

Actions Taken Desktop Table (1280px)

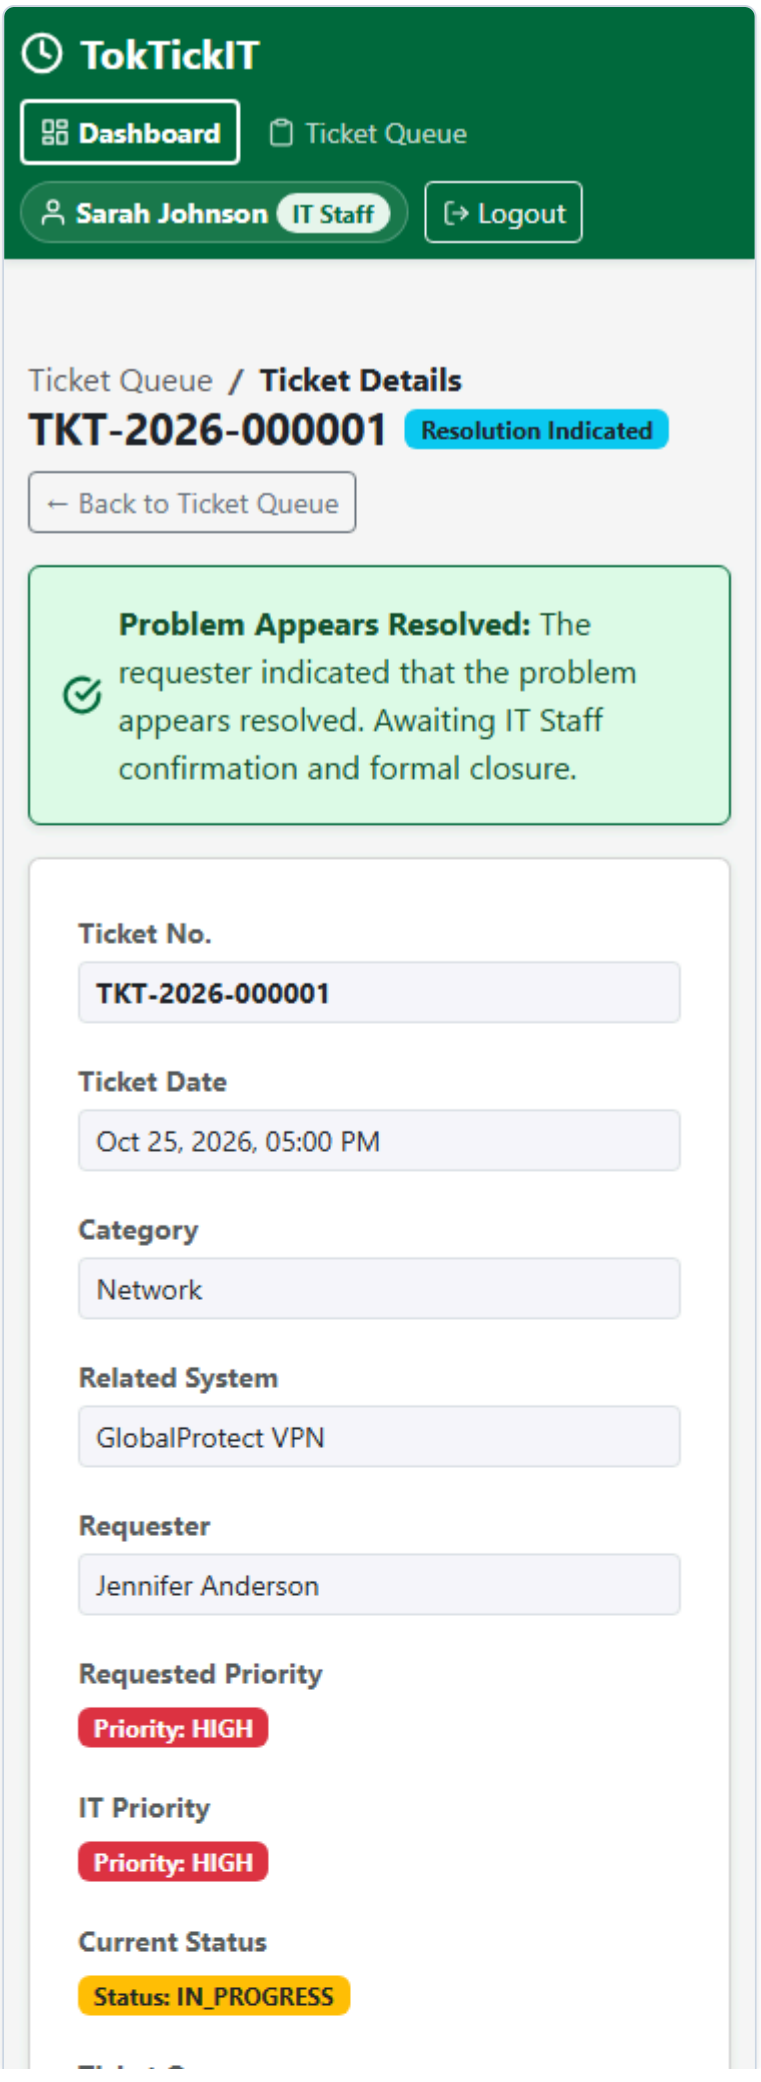

Displays Date/Time, Description, Result/Outcome, Performed By, Assigned To, Status Badge, Follow-Up badge, and Action buttons:

Actions Taken Desktop Table

Actions Taken Mobile Responsive Cards (375px)

On mobile devices (< 768px), the table seamlessly transforms into touch-optimized cards without horizontal clipping:

Sarah Johnson IT Staff — Oct 25, 2026, 05:30 PM

We have reviewed the network gateway logs. The certificate revocation list (CRL) cache on client side requires a force refresh.

Jennifer Anderson Requester — Oct 31, 2026, 09:30 PM

I refreshed the certificate store and connected successfully. ERP access is functioning normally now!

Resolution Note Input

7.4 Requester Reopen Flow & Modal (BR-07 / FR-13 / AC-10)

When a ticket is in `RESOLVED` status, the requester sees a Reopen banner and button. Clicking opens the Reopen Modal to provide a reason and transition status to `REOPENED`:

Requester Reopen Banner and Modal

Answer Part 8: Database & Migration Evidence

8.1 Schema Architecture & `ActionTaken` Prisma Model

The `ActionTaken` model in `server/prisma/schema.prisma` implements clean relational foreign keys:

```
enum ActionTakenStatus {
  PENDING
  IN_PROGRESS
  COMPLETED
  CANCELLED
}

model ActionTaken {
  id                Int               @id @default(autoincrement())
  ticketId          Int
  ticket            Ticket            @relation(fields: [ticketId], references: [id], onDelete: Cascade)
  actionDateTime    DateTime          @default(now())
  actionDescription String            @db.Text
  result            String?           @db.Text
  performedById     Int
  performedBy       User              @relation("ActionPerformer", fields: [performedById], references: [id], onDelete:
Restrict)
  assigneeId        Int?
  assignee          User?             @relation("ActionAssignee", fields: [assigneeId], references: [id], onDelete: SetN
ull)
  status            ActionTakenStatus @default(PENDING)
  followUpRequired  Boolean           @default(false)
  followUpNote      String?           @db.Text
  attachmentNotes   String?           @db.Text
  createdAt         DateTime          @default(now())
  updatedAt         DateTime          @updatedAt

  @@index([ticketId, status])
  @@index([assigneeId])
  @@index([performedById])
}
```

8.2 Down-Migration Strategy & Rollback DDL Execution

In compliance with Handout Section 5.2, the reverse rollback migration DDL was designed and verified via automated test `MIGR-01d`:

```
-- Down-Migration Rollback DDL (docs/lab-04/specification.md Section 7.3)
DROP TABLE IF EXISTS "ActionTaken" CASCADE;
DROP TYPE IF EXISTS "ActionTakenStatus";
```

Automated verification in `server/tests/lab-04/migration-rollback.test.ts` executes this DDL against live foreign-key linked records, proving clean rollback without orphan constraints or database deadlock.

8.3 Idempotent Seeding & Non-Destructive Legacy Support (MIGR-01b)

The seed script (`server/prisma/seed.ts`) idempotently seeds tickets across diverse lifecycle states (0 actions, 1 action, and multiple actions). Legacy tickets with 0 actions render cleanly and function without database errors.

Answer Part 9: Zen Green UI and Responsive Evidence

9.1 Zen Green Color Palette & Semantic Badge System

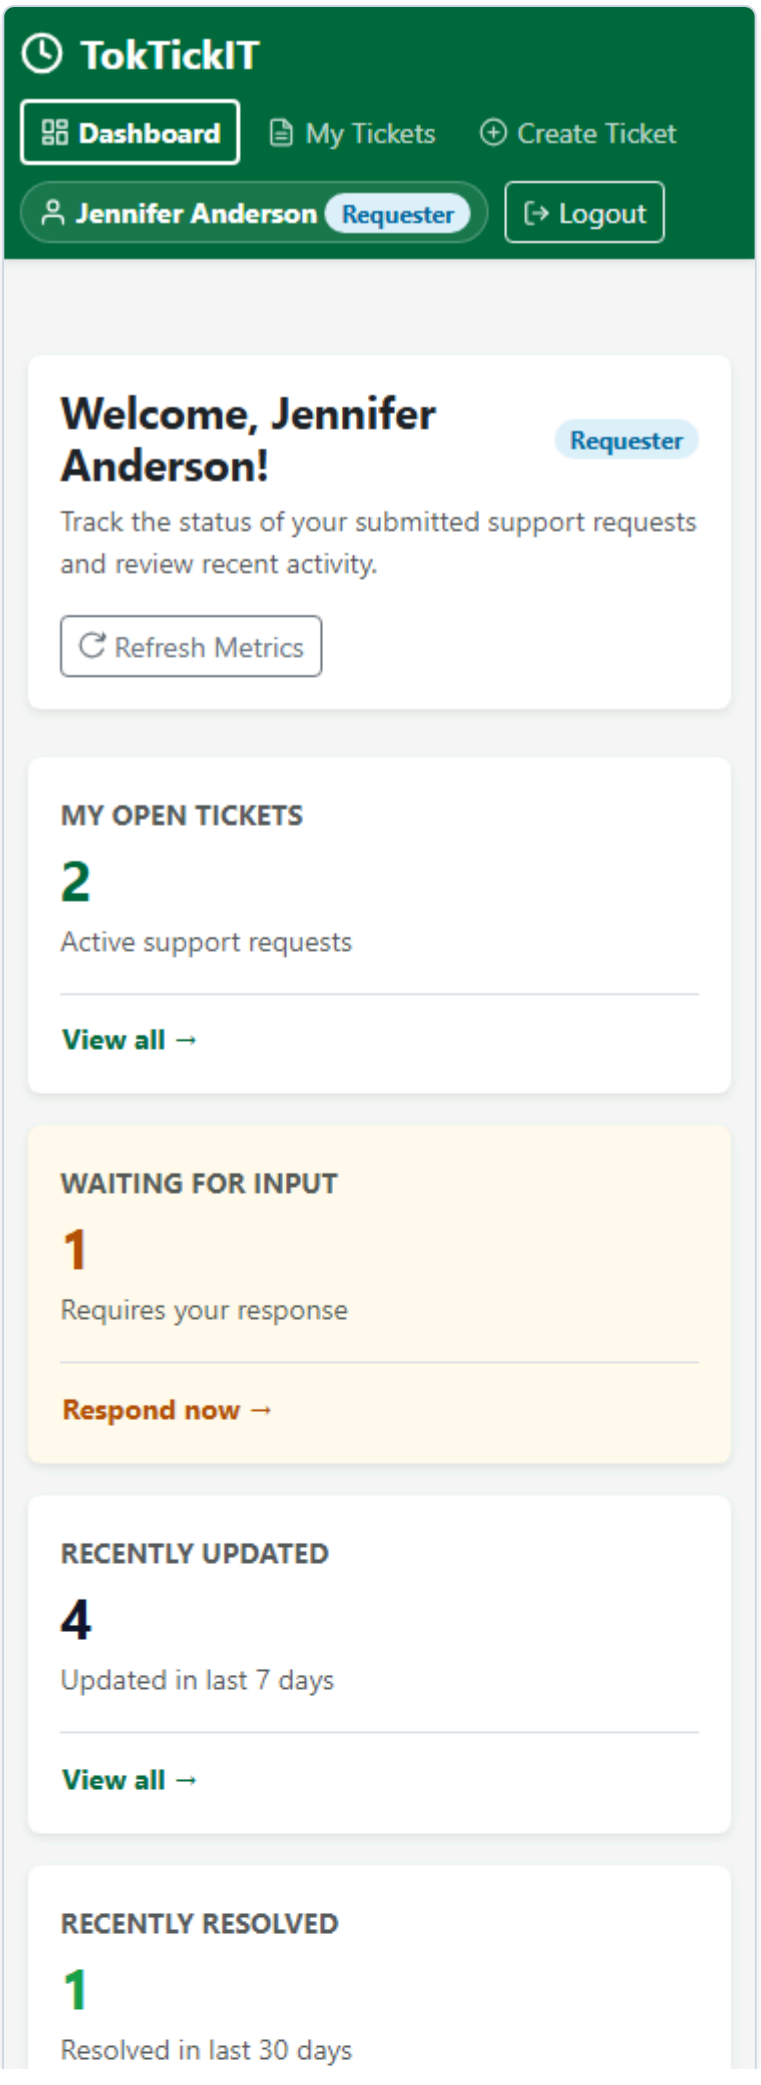

TokTickIT adheres strictly to the Zen Green design system:

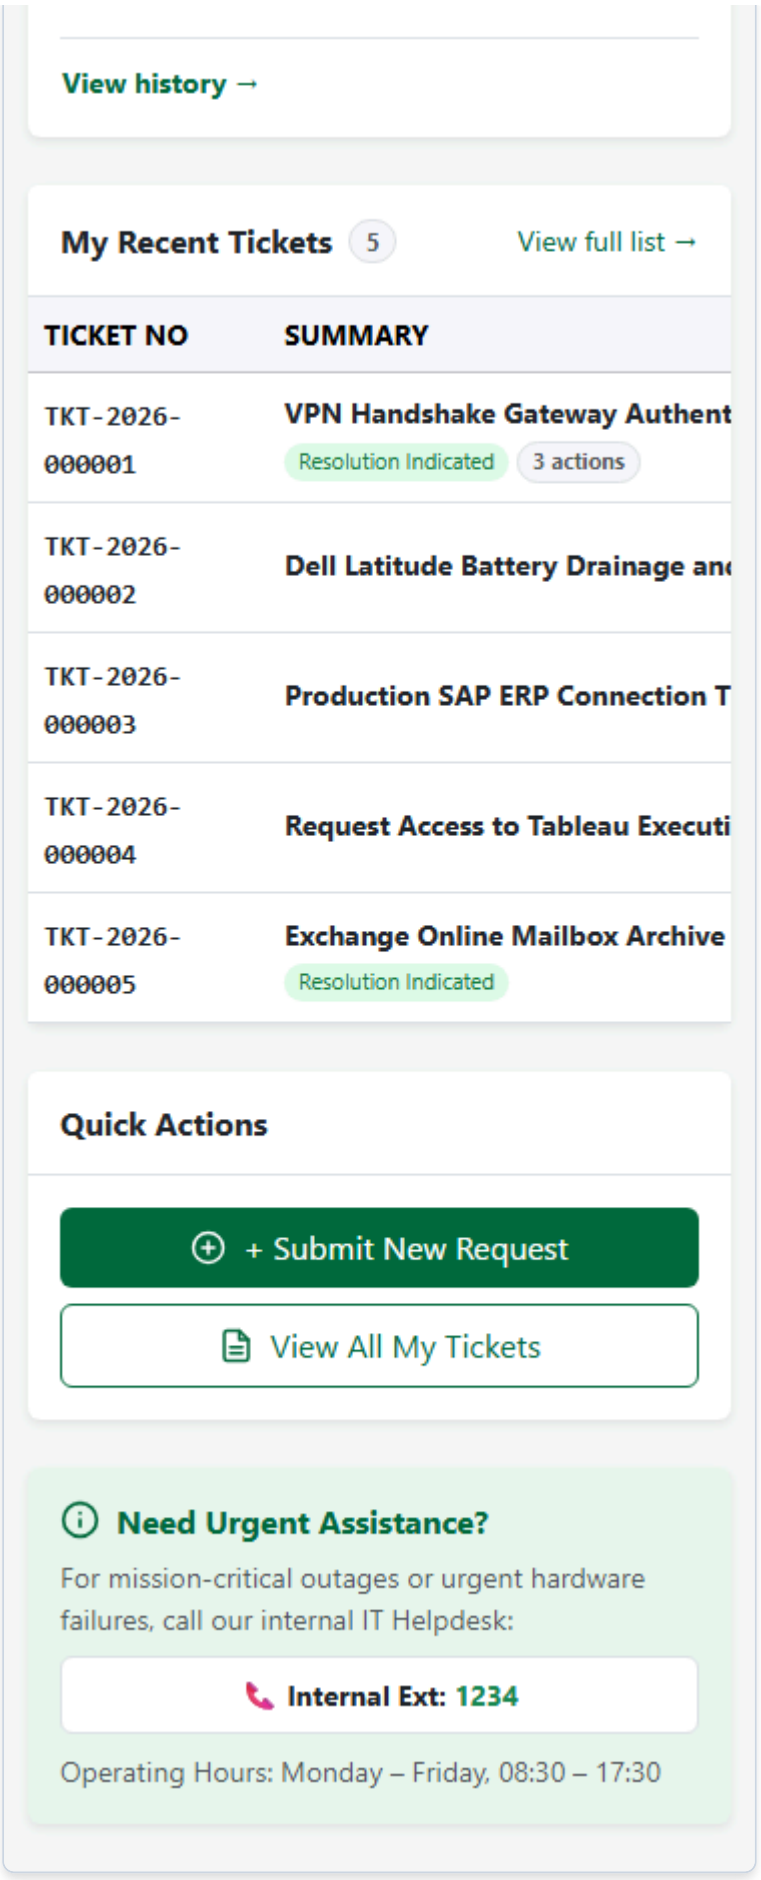

- **Primary Brand**: `#006B3C` (Deep Forest Green)
- **Secondary Brand**: `#0B7A46` (Medium Green)
- **Surface & Backgrounds**: `#F5F7F6` (Page background), `#DCFCE7` (Light green surface)
- **Status Badges**:
  - `NEW`: `#DBEAFE` / `#1E40AF` (Blue)
  - `OPEN`: `#DCFCE7` / `#15803D` (Zen Green)
  - `IN_PROGRESS`: `#FEF3C7` / `#B45309` (Amber)
  - `WAITING_FOR_REQUESTER`: `#FEE2E2` / `#B91C1C` (Coral)
  - `PENDING`: `#E2E8F0` / `#475569` (Slate)
  - `RESOLVED`: `#D1FAE5` / `#065F46` (Mint Green)
  - `REOPENED`: `#FEF08A` / `#854D0E` (Yellow)
  - `CLOSED`: `#1E293B` / `#F8FAFC` (Dark Slate)
  - `CANCELLED`: `#FEE2E2` / `#991B1B` (Red)

9.2 Mobile 375px Zero-Overflow Evidence

All views maintain strict responsive boundaries without horizontal overflow (`overflow-x: hidden`) on 375px mobile viewports:
