

TokTickIT Lab 2 — Final Engineering Deliverable

Metric / Field	Deliverable Details
Course & Sprint	CPE 334 — Lab 2: TokTickIT Requester Ticketing MVP with UI Foundation
Student / Author	<code>chanya06</code> (Chanya Poolketkij)
Peer Reviewer	Peer Reviewer (<code>lmaybelgrace1</code>)
Repository & Branch	[<code>chanya06/toktickit</code>](https://github.com/chanya06/toktickit) — <code>main</code> branch
Release PR	[PR #41](https://github.com/chanya06/toktickit/pull/41) (<code>lab2-staging</code> -> <code>main</code> merged)
Final Test Metric	107 / 107 Automated Tests Passed (Server: 54, Client: 42, Playwright E2E: 11)
Submission Date	September 6, 2026

Answer Part 1: Git Use with Engineering Workflow

1.1 Git Branching Strategy & Staging Workflow

TokTickIT Lab 2 strictly adhered to a disciplined Git feature-branch engineering workflow: - **Feature Isolation:** Every sprint issue was implemented on its own dedicated `feature/*` branch. - **Staging Integration:** Feature branches were merged into `lab2-staging` only after peer review approval by `lmaybelgrace1`. - **Release Integration:** Final sprint integration was performed via Release [PR #41](<https://github.com/chanya06/toktickit/pull/41>) from `lab2-staging` into `main`, which was reviewed and merged by the peer reviewer.

1.2 Pull Request & Kanban Board Audit Log

- **Sprint Project Board:** TokTickIT Individual Sprints (Kanban columns: `Backlog`, `Specified`, `Started`, `PR Review`, `Fixing`, `Done`). - **Peer Review Record:** All 13 sprint PRs were reviewed, commented, and approved by peer reviewer `lmaybelgrace1`. Complete review comments and resolution logs are documented in [`docs/lab-02/reviewer.md`] (<file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-02/reviewer.md>).

Pull Request Summary Table

PR #	Feature Branch	Scope / Description	Peer Reviewer Approval	Status
[#23] (https://github.com/chanya06/toktickit/pull/23)	feature/5-spec-and-tests	Engineering Specifications (specification.md , api-spec.md , ui-spec.md , tests.md)	Approved by lmaybelgrace1	Merged
[#25] (https://github.com/chanya06/toktickit/pull/25)	feature/6-db-schema-seed	Prisma Schema models & idempotent seed script	Approved by lmaybelgrace1	Merged
[#27] (https://github.com/chanya06/toktickit/pull/27)	feature/7-requester-context	Development Requester Selector UI & Persistent Context	Approved by lmaybelgrace1	Merged
[#29] (https://github.com/chanya06/toktickit/pull/29)	feature/8-create-ticket-api	Ticket creation REST API & TKT-YYYY-XXXXXX Generator	Approved by lmaybelgrace1	Merged
[#30] (https://github.com/chanya06/toktickit/pull/30)	feature/9-create-ticket-ui	Create Ticket screen & Zen Green Accessible Form Components	Approved by lmaybelgrace1	Merged
[#31] (https://github.com/chanya06/toktickit/pull/31)	feature/10-my-tickets-api	Paginated My Tickets API with Search/Filter/Sort	Approved by lmaybelgrace1	Merged
[#32] (https://github.com/chanya06/toktickit/pull/32)	feature/11-my-tickets-ui	My Tickets screen, Search/Filter controls & Mobile Card view	Approved by lmaybelgrace1	Merged
[#33] (https://github.com/chanya06/toktickit/pull/33)	feature/12-ticket-detail	Ticket Detail view, read-only layout & ownership guard	Approved by lmaybelgrace1	Merged
[#34] (https://github.com/chanya06/toktickit/pull/34)	feature/13-attachment-lifecycle	Attachment Upload stream, Magic Bytes validation & Soft Removal	Approved by lmaybelgrace1	Merged
[#35] (https://github.com/chanya06/toktickit/pull/35)	feature/14-qa-release	QA, Initial Attachments Drag&Drop, State Screenshots & Deliverable	Approved by lmaybelgrace1	Merged
[#37] (https://github.com/chanya06/toktickit/pull/37)	feature/15-ui-refinement	Refine Web UI layout alignment with instructor mockups & Emoji purge	Approved by lmaybelgrace1	Merged
[#39] (https://github.com/chanya06/toktickit/pull/39)	feature/16-reviewer-docs-sync	Refine reviewer log with feedback column & sync test metrics	Approved by lmaybelgrace1	Merged
[#41] (https://github.com/chanya06/toktickit/pull/41)	lab2-staging	Final Sprint Release integration into main	Approved by lmaybelgrace1	Merged

1.3 Repository Setup & Exclusions

- **Repository README:** Contains full setup instructions, seed commands, database configuration, and test execution guides. - **Git Ignore (.gitignore):** Properly excludes node_modules/ , dist/ , .env , temporary file uploads in uploads/ , and build

outputs.

1.4 Directory Structure (Section 12 Compliance)

Answer Part 2: Spec DD

2.1 Engineering Specification Link

The complete engineering specification is documented under [docs/lab-02/specification.md]
(file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-02/specification.md).

2.2 Specification Structure & Business Rules

- **Functional Requirements (FR-01..FR-15)**: Comprehensive specifications for ticket creation, paginated listing, detail retrieval, initial attachment uploads, soft removals, multi-filter search, and cross-requester data isolation. - **Mandatory Business Rules (BR-01..BR-16)**: - BR-01 : Backend auto-generates unique sequential Ticket Number TKT-YYYY-XXXXXX . - BR-02 : New ticket initial status is NEW . - BR-03 : Development Requester selector is for testing context switching only (not authentication). - BR-07 : Summary length is 5-120 chars; Description length is 10-2000 chars. - BR-10 : Allowed attachment types: .jpg , .jpeg ,

`.png` , `.webp` , `.pdf` , max size `<= 5 MB` per file. - `BR-11` : Maximum active attachments limit: 5 files per ticket. - `BR-12` : Soft removal retains metadata, sets `isRemoved: true` , and blocks binary downloads (`403 Forbidden`). - `BR-13` : Soft removal requires a non-empty removal reason (minimum 3 characters). - `BR-15` : Initial attachments creation and DB persistence are wrapped in `Prisma.$transaction` with automatic disk compensation (`cleanupFiles`) on failure.

2.3 Acceptance Criteria (`AC-01..AC-10`) & Definition of Done

100% of Acceptance Criteria (`AC-01..AC-10`) are mapped directly to automated test cases across 5 test levels in [`docs/lab-02/tests.md`](file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-02/tests.md).

Answer Part 3: Test DD and Traceability

3.1 Test Plan Document Link

The test plan and traceability matrix are documented under [`docs/lab-02/tests.md`](file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-02/tests.md).

3.2 Acceptance-Criterion Traceability Matrix

AC ID	Acceptance Criterion Summary	Validating Automated Test Files	Pass Status
AC-01	Create Ticket with Ticket Number & Ticket Date	<code>create-ticket.api.test.ts</code> , <code>CreateTicket.test.tsx</code> , <code>requester-ticket-flow.spec.ts</code>	Pass
AC-02	Requester Selector modal required when unselected	<code>RequesterSelect.test.tsx</code> , <code>requester-ticket-flow.spec.ts</code>	Pass
AC-03	My Tickets owned tickets list & requester filtering	<code>my-tickets.api.test.ts</code> , <code>MyTickets.test.tsx</code> , <code>requester-ticket-flow.spec.ts</code>	Pass
AC-04	Cross-Requester Ticket Access Blocked (403 Forbidden)	<code>ticket-detail.api.test.ts</code> , <code>attachments.api.test.ts</code> , <code>requester-ticket-flow.spec.ts</code>	Pass
AC-05	Soft removal with reason & blocked download stream	<code>attachments.api.test.ts</code> , <code>AttachmentSection.test.tsx</code> , <code>requester-ticket-flow.spec.ts</code>	Pass
AC-06	Max 5 active attachments limit enforcement	<code>create-ticket.api.test.ts</code> , <code>attachments.api.test.ts</code>	Pass
AC-07	File size (<code><=5MB</code>) & type magic bytes validation	<code>create-ticket.api.test.ts</code> , <code>CreateTicket.test.tsx</code> , <code>AttachmentSection.test.tsx</code>	Pass
AC-08	Search query in My Tickets list	<code>my-tickets.api.test.ts</code> , <code>MyTickets.test.tsx</code> , <code>requester-ticket-flow.spec.ts</code>	Pass
AC-09	Ticket Date timestamp displayed across screens	<code>create-ticket.api.test.ts</code> , <code>CreateTicket.test.tsx</code> , <code>RequesterTicketDetail.test.tsx</code>	Pass
AC-10	Form values preserved on submission failure	<code>CreateTicket.test.tsx</code>	Pass

3.3 Execution Results Summary

- **Server Unit & API Tests:** 54 / 54 passed (`npm run test --prefix server`) - **Client Component & Style Tests:** 42 / 42 passed (`npm run test --prefix client`) - **Playwright E2E Tests:** 11 / 11 passed (`npx playwright test`) - **Total Suite Coverage:** 107 / 107 Passed (100% Green across all test levels).

Answer Part 4: AI Use with Reflection

4.1 LLM Model & Pairing Setup

Engineering work was conducted in pair programming with **Antigravity AI (Gemini 2.5 Pro)**. Full prompt logs are documented in [docs/lab-02/ai-use.md](file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-02/ai-use.md).

4.2 Key Prompts Summary (Prompts P-01 to P-12)

- **P-01 to P-04:** Architecting engineering specifications, API OpenAPI schemas, and Zen Green design tokens. - **P-05 to P-08:** Implementing ticket sequence generator (TKT-YYYY-XXXXXX), atomic Prisma transactions, and binary magic bytes file validation.
- **P-09 to P-12:** Building initial attachments dropzone with HTML5 drag-and-drop, Playwright E2E automation, and disk rollback compensation logic.

4.3 My Reflection

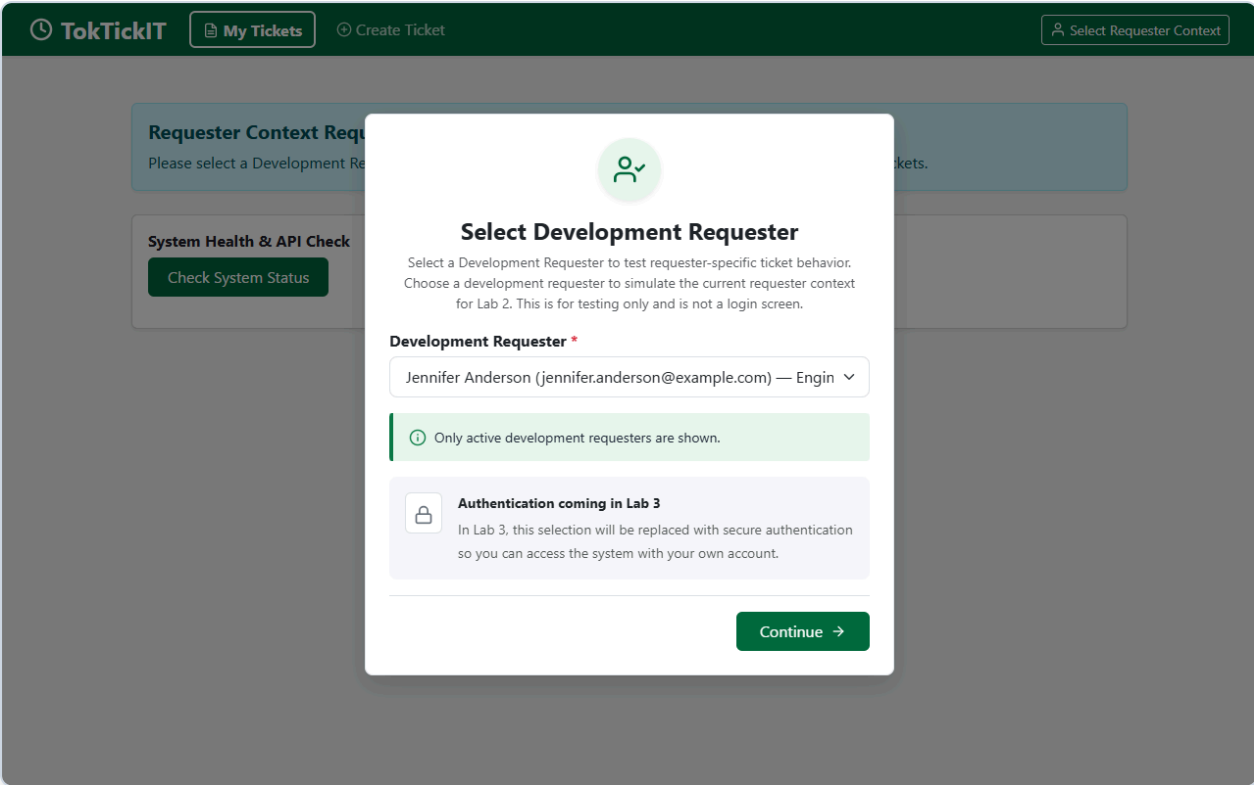

Pairing with an AI agent under Spec DD methodology enforced rigorous upfront planning. The AI excelled at detecting edge-case race conditions in concurrent upload transactions and generating thorough unit/integration tests for magic bytes security validation.

Answer Part 5: Development Requester Select Screen

5.1 Simulated Login Context Selector

Because full authentication is introduced in Lab 3, a **Development Requester Selector** modal (RequesterSelectorModal.tsx) simulates user login. The selected requester context is persisted in localStorage and sent via X-Requester-Id HTTP headers and requestId query parameters.

5.2 Requester Selector Screenshot

Development Requester Selector

Answer Part 6: Working Ticket Screen: Create Mode

6.1 Create Ticket Layout & Workflow

The Create Ticket screen enables users to submit IT support tickets with optional initial file attachments (up to 5 files, <=5MB each, allowed formats: .jpg , .jpeg , .png , .webp , .pdf).

6.2 Working State Screenshots
