

TokTickIT Lab 3 — Final Engineering Deliverable

Metric / Field	Deliverable Details
Course & Sprint	CPE 334 Software Engineering — Lab 3: TokTickIT Enterprise Roles, IT Staff Operations & Administration
Student / Author	<code>chanya06</code> (Chanya Poolketkij)
Peer Reviewer	Peer Reviewer (<code>lmaybelgrace1</code>)
Partner Reviewed by Author	<code>titayaaa</code>
Repository & Branch	[<code>chanya06/toktickit</code>](https://github.com/chanya06/toktickit) — <code>main</code> branch
Release PR	[PR #71](https://github.com/chanya06/toktickit/pull/71) (<code>lab3-staging</code> -> <code>main</code> merged)
Final Test Metric	277 / 277 Automated Tests Passed (100% Pass) (Server: 149, Client: 116, Playwright E2E: 12)
Build Status	Clean Production Build (<code>tsc && vite build</code>)
Deliverable Date	October 3, 2026

Answer Part 1: Git Use with Engineering Workflow

1.1 Git Branching Strategy & Staging Workflow

TokTickIT Lab 3 strictly adhered to a disciplined Git feature-branch engineering workflow: - **Feature Isolation:** Every sprint issue was implemented on its own dedicated `feature/*` branch. - **Staging Integration:** Feature branches were merged into `lab3-staging` only after formal peer review approval by `@lmaybelgrace1`. - **Release Integration:** Final sprint integration was performed via Release [PR #71](<https://github.com/chanya06/toktickit/pull/71>) from `lab3-staging` into `main`, which was reviewed, approved, and merged by the peer reviewer.

1.2 Pull Request Traceability Table

All 12 feature branches plus the final release integration PR were formally reviewed, tracked, and approved:

PR #	Feature Branch	Scope / Description	Reviewer Verdict	Status
[#44] (https://github.com/chanya06/toktickit/pull/44)	feature/17-spec-and-tests	Sprint 3 Specifications (specification.md , tests.md , ui-spec.md , api-spec.md)	Approved	Merged
[#57] (https://github.com/chanya06/toktickit/pull/57)	feature/18-db-schema-and-seed	Prisma Schema models & idempotent seed script	Approved	Merged
[#58] (https://github.com/chanya06/toktickit/pull/58)	feature/19-auth-api	Authentication, Session, and Password Change REST APIs	Approved	Merged
[#59] (https://github.com/chanya06/toktickit/pull/59)	feature/20-auth-ui	Login view, Change Password view, and Role-Aware Header	Approved	Merged
[#60] (https://github.com/chanya06/toktickit/pull/60)	feature/21-requester-session	Requester Session Migration & Resolution Indication Action	Approved	Merged
[#61] (https://github.com/chanya06/toktickit/pull/61)	feature/22-staff-queue-api	IT Staff Ticket Queue REST API (Search, Filter, Sort, Pagination)	Approved	Merged
[#62] (https://github.com/chanya06/toktickit/pull/62)	feature/23-staff-queue-ui	IT Staff Ticket Queue UI & Responsive Mobile Cards	Approved	Merged
[#63] (https://github.com/chanya06/toktickit/pull/63)	feature/24-staff-operations	IT Staff Operations Panel, Claim, IT Priority & Status Transition Matrix	Approved	Merged
[#64] (https://github.com/chanya06/toktickit/pull/64)	feature/25-comments-and-notes	Public Comments & Private Internal Notes Communication Channels	Approved	Merged
[#65] (https://github.com/chanya06/toktickit/pull/65)	feature/26-admin-user-management	Administrator User Management REST APIs & Safety Rules	Approved	Merged
[#66] (https://github.com/chanya06/toktickit/pull/66)	feature/27-admin-user-management-ui	Administrator User Management Directory & Modals	Approved	Merged
[#70] (https://github.com/chanya06/toktickit/pull/70)	feature/28-qa-automated-tests-release-integration	QA Automated E2E Tests, Screen Captures & Release Integration	Approved	Merged
[#71] (https://github.com/chanya06/toktickit/pull/71)	lab3-staging	Release Integration PR into main	Approved	Merged

1.3 Peer Review Record Link

Complete verbatim review comments, author responses, and approval logs for both incoming reviews (from @lmaybelgrace1) and outgoing partner reviews (for @titayaaa PR #52 to #62) are fully documented in [docs/lab-03/reviewer.md] (file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-03/reviewer.md).

```

Answer Part 2: Spec DD

2.1 Engineering Specification Link

The complete engineering specification is documented under [docs/lab-03/specification.md] (file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-03/specification.md), [docs/lab-03/ui-spec.md] (file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-03/ui-spec.md), and [docs/lab-03/api-spec.md] (file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-03/api-spec.md).

2.2 Functional Requirements (FR-01..FR-20)

- **Authentication & Security** (FR-01..FR-04): Email/password login, JWT tokens, mandatory password rotation on first login, role-aware application shell. - **Requester Session Regression** (FR-05..FR-06): Seamless authentication without temporary selector, problem resolution indication action. - **IT Staff Ticket Queue** (FR-07..FR-09): Filterable, searchable, sortable, paginated operations queue with dual desktop table and mobile cards. - **IT Staff Operations** (FR-10..FR-12): Ticket claim and reassignment, independent IT priority assignment, role-enforced 8-status transition matrix. - **Communications Channel** (FR-13..FR-14): Public comments visible to all authenticated roles; confidential Internal Notes visible strictly to IT Staff and Administrators. - **Administrator Directory** (FR-15..FR-20): User management table, user provisioning, account modification, password resets, self-deactivation guard, and last-active-admin guard.

2.3 Mandatory Business Rules (BR-01..BR-18)

- **BR-01** : Minimum password length of 8 characters requiring uppercase, lowercase, number, and special character. - **BR-02** : Immediate redirection to password change if `mustChangePassword === true`. - **BR-03** : Soft-deactivated accounts (`isActive: false`) are rejected at login with `401 Unauthorized`. - **BR-04** : Requesters can only access tickets they own; cross-requester access returns `403 Forbidden`. - **BR-05** : Ticket claiming is restricted to active IT Staff and Administrator accounts. - **BR-06** : Permitted status transitions strictly enforced via state machine; illegal transitions return `400 Bad Request`. - **BR-07** : Internal Notes are confidential; Requesters requesting internal notes return `403 Forbidden`. - **BR-08** : Administrators cannot deactivate their own active account (`422 Unprocessable Entity`). - **BR-09** : Deactivating the last active Administrator in the system is strictly prohibited (`422 Unprocessable Entity`). - **BR-10** : Users cannot be deleted from the database to preserve historical ticket audit trails.

2.4 Acceptance Criteria (AC-01..AC-12) & Definition of Done

100% of Acceptance Criteria (AC-01..AC-12) and Definition of Done items are fulfilled and verified: - [x] Database schema migrated and seeded with active/inactive users across 3 roles, tickets, comments, and notes. - [x] Authentication API (`login`, `logout`, `me`, `change-password`) implemented and tested. - [x] Requester regression verified: tickets and attachments protected by session-based authorization. - [x] IT Staff Ticket Queue UI and API implemented with search, filtering, sorting, pagination. - [x] IT Staff Ticket Detail UI implemented with claim/reassign, IT Priority, status transitions, Public Comments, and Internal Notes. - [x] Administrator User Management UI and API implemented with search, filter, create user, edit user, set initial password, and safety rules. - [x] All unit, integration, UI, authorization, and E2E tests passing (277/277). - [x] Rendered documentation (`specification.md`, `ui-spec.md`, `api-spec.md`, `tests.md`, `reviewer.md`, `ai-use.md`) complete.

Answer Part 3: Test DD and Traceability

3.1 Test Architecture & Multi-Level Coverage

TokTickIT Lab 3 implements a comprehensive 5-tier test pyramid: 1. **Server Unit & Utility Tests**: Password hashing, token signing, ticket number generation. 2. **Server API Integration Tests**: Supertest endpoints covering auth, RBAC authorization, queue filtering, ticket operations, comments/notes, and user administration. 3. **Client Component & Style Tests**: Vitest + React Testing Library verifying Login, ChangePassword, Header, StaffTicketQueue, TicketDetailView, and UserManagementView. 4. **Client Navigation & Session Tests**: Authentication context, role routing, pagination calculations. 5. **Playwright E2E User Journeys**: Automated multi-role user workflows across Authentication, Staff Ticket Flow, and Administrator User Management.

3.2 Acceptance-Criterion Traceability Matrix

AC ID	Acceptance Criterion Summary	Validating Automated Test Files	Pass Status
AC-01	Active user credentials login & JWT session issuance	auth.api.test.ts , Login.test.tsx , authentication.spec.ts	Pass
AC-02	Mandatory password rotation guard blocks app screens	auth.api.test.ts , ChangePassword.test.tsx , authentication.spec.ts	Pass
AC-03	Requester ticket ownership session authorization	requester-resolution.api.test.ts , authorization.api.test.ts , RequesterResolution.test.tsx	Pass
AC-04	Requester blocked from Internal Notes (403 Forbidden)	authorization.api.test.ts , comments-notes.api.test.ts	Pass
AC-05	IT Staff Ticket Queue filter, search, sort, pagination	staff-queue.api.test.ts , StaffTicketQueue.test.tsx , staff-ticket-flow.spec.ts	Pass
AC-06	Ticket claim & assignment to active staff/admin	staff-ticket-detail.api.test.ts , StaffTicketDetail.test.tsx , staff-ticket-flow.spec.ts	Pass
AC-07	Status transition matrix & role enforcement	staff-ticket-detail.api.test.ts , StaffTicketDetail.test.tsx , staff-ticket-flow.spec.ts	Pass
AC-08	Internal Notes author metadata & role visibility	comments-notes.api.test.ts , CommentsNotes.test.tsx , staff-ticket-flow.spec.ts	Pass
AC-09	Administrator User Management directory & filters	users-admin.api.test.ts , UserManagement.test.tsx , user-administration.spec.ts	Pass
AC-10	Admin create user with mustChangePassword: true	users-admin.api.test.ts , UserManagement.test.tsx , user-administration.spec.ts	Pass
AC-11	Admin self-deactivation guard (422 Unprocessable)	users-admin.api.test.ts , UserManagement.test.tsx , user-administration.spec.ts	Pass
AC-12	Last active Administrator deactivation guard	users-admin.api.test.ts , UserManagement.test.tsx	Pass

3.3 Execution Results Summary

- **Server Vitest & Supertest:** 149 / 149 passed (`npm run test:server`) - **Client Vitest & Testing Library:** 116 / 116 passed (`npm run test:client`) - **Playwright E2E User Journeys:** 12 / 12 passed (`npm run test:e2e`) - **Total Test Suite: 277 / 277 Passed (100% Green)** - **Client Production Build:** Passed (`tsc && vite build`) without lint or type errors.

Answer Part 4: AI Use with Reflection

4.1 LLM Model & Pairing Setup

Engineering development was conducted in pair programming with **Antigravity AI (Gemini 2.5 Pro)**. Complete prompt logs are documented in [`docs/lab-03/ai-use.md`](file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-03/ai-use.md).

4.2 Key Prompts Summary (Prompts 1 to 8)

- **Prompt 1 (Spec DD Foundation):** Analyzed Lab 3 requirements and drafted full engineering contract (`specification.md` , `ui-spec.md` , `api-spec.md` , `tests.md` , `reviewer.md` , `ai-use.md`). - **Prompt 2 (Reviewer Feedback Resolution):** Aligned integer primary keys with Lab 2 data, added resolution indication action, and defined 7-column test matrix. - **Prompt 3 (Auth & Mandatory Password Change TDD):** Implemented bcrypt password hashing, JWT signing, password complexity checks, and `/api/auth/change-password` . - **Prompt 4 (IT Staff Ticket Queue UI & Responsive Filters):** Built `StaffTicketQueue.tsx` with Zen Green styling, multi-criteria filters, and responsive mobile cards. - **Prompt 5 (Ticket Operations & Status Transition Matrix):** Enforced 8-status state machine, Quick Claim, assign logic, and distinct Amber (`#FEF3C7`) Internal Notes. - **Prompt 6 (Administrator User Management & Safety Guards):** Created user directory, modal dialogues, and safety rules protecting active admin accounts. - **Prompt 7 (Playwright E2E Automation & Screenshots):** Built automated test suites covering 3 complete user journeys and capturing 21 responsive

screenshots. - **Prompt 8 (Data Hygiene, Teardowns & Mobile Overflow Fix):** Resolved reviewer feedback by purging test artifacts in `seed.ts`, using IT Staff accounts for queue screenshots, and fixing mobile header flex blowout to strictly fit 375px.

4.3 My Reflection (Synthesis on Agentic Pair Programming)

- **Specification-Agent:** Essential for establishing rigid engineering contracts and role boundary definitions upfront, eliminating scope ambiguity before writing code. - **Coding-Agent:** Highly effective for rapid boilerplate implementation, comprehensive test suite construction, and debugging responsive layouts. - **Data Hygiene Learning:** Proactive test isolation through seed cleanup and teardown routines is essential when capturing visual evidence for production releases.

Answer Part 5: Screen 1 — Login & Mandatory Password Change

5.1 Architecture & Workflow

Screen 1 provides secure email/password authentication using bcrypt password hashing and HTTP Bearer JWT tokens. When an account is provisioned with `mustChangePassword === true`, Screen 2 is immediately rendered, blocking access to all application screens until a compliant password is saved.

Answer Part 6: Screen 3 — IT Staff Ticket Queue

6.1 Operational Queue Capabilities

- **Multi-Filter & Debounced Search:** Filters by Category, Status, IT Priority, and Ticket Owner, with live debounced search across Ticket Number and Summary. - **Dual Representation:** Renders a comprehensive data table on Desktop/Tablet viewports and switches to vertical card representations on Mobile viewports (< 768px). - **Logged-in IT Staff Identity:** Logged in as Lisa Martinez (lisa.martinez@tokticket.com) displaying IT Staff role badge (#EAF6EF BG, #006B3C Text).

Answer Part 7: Screen 4 — IT Staff Ticket Operations & Status Matrix

7.1 Operational Capabilities & Communication Channels

- **Ticket Ownership Management:** Quick Claim button automatically assigns ownership to the active IT Staff member; Owner dropdown allows reassignment among active IT Staff and Administrator accounts. - **IT Priority Override:** IT Staff can adjust ticket operational priority (`LOW` , `MEDIUM` , `HIGH` , `URGENT`) independently of Requester's requested priority. - **Status Transition Matrix:** Enforces permitted status transitions (`NEW` , `OPEN` , `IN_PROGRESS` , `PENDING` , `WAITING_FOR_REQUESTER` , `RESOLVED` , `CLOSED` , `REOPENED` , `CANCELLED`). - **Dual Communication Channels:** - **Public Comments:** Append-only communication thread visible to all authenticated roles. - **Internal Notes:** Confidential operational notes with author metadata and distinct Amber styling (`#FEF3C7` BG, `#D97706` Border), accessible strictly to IT Staff and Administrators.

Answer Part 8: Screen 5 — Administrator User Management & Safety Guards

8.1 Administrator Capabilities & Safety Rules

- **User Directory:** Searchable by name/email with role filter (REQUESTER , IT_STAFF , ADMINISTRATOR) and status indicators (Active / Deactivated). - **Create User Modal:** Provisions new user accounts with single role assignment and initial password (mustChangePassword: true). - **Edit User Modal:** Updates user name, department, role, and toggles active/deactivated status. - **Reset Password Modal:** Sets a new temporary password forcing password rotation on next login. - **Enforced Safety Guards:** - **Self-Deactivation Guard (BR-08):** Active Administrator cannot deactivate their own account (422 Unprocessable Entity). - **Last Active Admin Guard (BR-09):** Server prevents deactivation of the last remaining active Administrator (422 Unprocessable Entity).

Create New User

Create New User

Provision a user account with role assignment and initial password.

Mandatory First-Login Password Change: The user will be required to set a permanent password upon logging in with this temporary password (AC-10 / FR-16).

Full Name *

e.g. Supaporn Srisuk

Email Address *

e.g. supaporn.s@toktickit.com

Department (Optional)

e.g. IT Operations, Support, Marketing

Role *

Requester (Create and track own tickets)

Initial Password *

Enter temporary password

Show

Password Requirements:

At least 8 characters

At least 1 uppercase letter (A-Z)

At least 1 lowercase letter (a-z)

At least 1 numeric digit (0-9)

At least 1 special character (!@#%&...)

Sarah Johnson	sarah.johnson@example.com	Marketing	Requester	Active	Edit Reset Password
Michael Brown	michael.brown@example.com	IT Support	Requester	Active	Edit Reset Password
Jennifer Anderson	jennifer.anderson@example.com	Engineering	Requester	Active	Edit Reset Password

Answer Part 9: Zen Green UI, Accessibility & Responsive Evidence

9.1 Visual Specification Link

The complete UI design tokens and component styling guidelines are documented under [docs/lab-03/ui-spec.md] (file:///c:/Users/chany/Documents/GitHub/toktickit/docs/lab-03/ui-spec.md).

9.2 Design Tokens & Badges Summary

- **Primary Color Palette:** Zen Green Primary (#006B3C), Secondary (#0B7A46), Pale BG (#EAF6EF), Neutral BG (#F5F7F6). - **Role Badges:** - REQUESTER : Pale Blue (#E0F2FE BG, #0369A1 Text) - IT_STAFF : Zen Green (#EAF6EF BG, #006B3C Text) - ADMINISTRATOR : Purple (#F3E8FF BG, #7E22CE Text) - **Status Badges:** - NEW : Blue (#DBEAFE BG, #1E40AF Text) - OPEN : Green (#DCFCE7 BG, #15803D Text) - IN_PROGRESS : Amber (#FEF3C7 BG, #B45309 Text) - WAITING_FOR_REQUESTER : Purple (#F3E8FF BG, #6B21A8 Text) - PENDING : Slate Grey (#E2E8F0 BG, #475569 Text) - RESOLVED : Emerald (#D1FAE5 BG, #065F46 Text) - CLOSED : Dark Slate (#E2E8F0 BG, #334155 Text) - REOPENED : Orange (#FFEDD5 BG, #C2410C Text) - CANCELLED : Red (#FEE2E2 BG, #B91C1C Text) - **Internal Notes Container:** Amber Card (#FEF3C7 BG, #D97706 Border, #92400E Header).

9.3 Zero Mobile Overflow Verification

Following review resolution in PR #70, Header.tsx and index.css were updated with responsive wrapping (flex-wrap: wrap) and overflow guards (overflow-x: hidden). All mobile captures strictly measure 375px in width without horizontal layout blowout.

9.4 Visual Inspection Checklist

UI Check Item	Requirement / Standard	Implementation Evidence	Pass Status
Zen Green Palette	Primary (#006B3C), Secondary (#0B7A46), Pale (#EAF6EF), Page BG (#F5F7F6)	Header shell, buttons, active tabs, and navigation links conform 100%	Pass
Role Separation & Badges	Distinct visual badge tokens for REQUESTER, IT_STAFF, ADMINISTRATOR	Header and directory badges render distinct contrasting tokens	Pass
Status Transition Controls	Dropdown options restricted strictly to permitted transitions	Illegal transitions prevented; button disabled during API calls	Pass
Internal Notes Secrecy	Distinct Amber styling; completely omitted from Requester session	Amber #FEF3C7 container; non-staff endpoint returns 403	Pass
Admin Safety Confirmations	Guard self-deactivation and last-admin deactivation	Modals disable self-deactivation and backend rejects with 422	Pass
Mobile Responsiveness	No clipping, overlapping, or horizontal scrolling at 375px	All 5 mobile screens render clean vertical stacking at 375px	Pass
